

New products for 2019

Connection and automation technology

New products for 2019

Innovative products for your industrial systems

As a leading manufacturer of connection technology and automation components, we are always working to turn the growing demands of your applications and markets into new innovations.

You can use our products to increase the efficiency, availability, and safety of your industrial systems. Discover the advantages of our diverse new products for yourself.

COMPLETE line – The comprehensive solution for the control cabinet

COMPLETE line is a system comprising technologically leading and coordinated hardware and software products, consulting services, and system solutions that help you optimize your processes in control cabinet manufacturing. Engineering, purchasing, installation, and operation become significantly easier for you.

Your advantages in detail:

Comprehensive product portfolio

COMPLETE line offers you a complete product portfolio of technologically advanced products. This includes:

- Controllers and I/O modules
- Power supplies and device circuit breakers
- Terminal blocks and distribution blocks
- Relay modules and motor starters
- Signal conditioners
- Safety technology
- Surge protection
- Heavy-duty connectors

Intuitive handling

Thanks to the simple, intuitive handling of the coordinated hardware components, you will save time in the assembly, startup, and maintenance processes. With Push-in connection technology you are able to wire applications quickly and without using tools. The broad, technologically leading product portfolio will always provide you with the right product for standard or special applications.

Saving time in the entire engineering process

The PROJECT complete planning and marking software supports the entire process of control cabinet manufacturing. The program features an intuitive user interface that enables the individual planning, automatic checking, and direct ordering of terminal strips.

Reduced logistics costs

Reduced variety of parts, thanks to standardized marking, bridging, and testing accessories. The COMPLETE line system coordinates products, design, and accessories so that you benefit from maximum reusability and thus reduce your logistics costs.

Optimized processes in control cabinet manufacturing

COMPLETE line supports you, from engineering through to manufacturing, in designing your control cabinet production as efficient as possible. Thus, your customized concept for optimizing your processes in control cabinet manufacturing is created. Our terminal strip production helps you to flexibly manage order peaks or to supply your control cabinet production with fully assembled DIN rails just in time.

The new standard for the control cabinet

Discover the entire COMPLETE line product portfolio. All products that are labeled with the following marking are part of the coordinated COMPLETE line system. Happy reading!

Terminal blocks with Push-in connection

Side conductor connection, better overview

PTV, the terminal block series with a side Push-in connection. In cramped spaces, the side conductor connection ensures clearer wiring and an improved ability to detect the conductor and connection marking.

Push-in Technology[®]
Designed by PHOENIX CONTACT

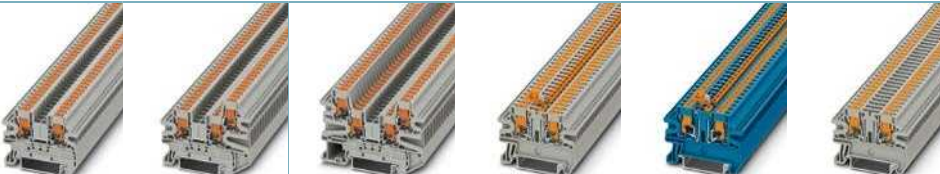

COMPLETE line

Your advantages

- ✓ Side conductor insertion for improved ability to detect the connection and conductor marking
- ✓ Clearly arranged wiring without bending radii
- ✓ Time-saving conductor connection, thanks to tool-free Push-in direct connection technology
- ✓ The connection principle and conductor routing are self-explanatory
- ✓ Use of CLIPLINE complete standard accessories

Main features

- Vertical Push-in connection
- Voltage up to 800 V
- Current up to 28 A
- Cross section up to 4 mm²
- Bridging and testing option

Distribution blocks with Push-in connection

Inserted quickly and flexibly

All PTFIX distribution blocks are now available with a 1.5 mm² Push-in connection and with various connection numbers and mounting types. They are connection-ready and can be configured individually.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Time savings of up to 80%, thanks to ready-to-mount blocks without manual bridging
- ✓ Flexible use, thanks to DIN rail, direct or adhesive mounting
- ✓ Time-saving conductor connection, thanks to tool-free Push-in direct connection technology
- ✓ Space savings of up to 50% on the DIN rail, thanks to transverse mounting

Main features

- Push-in connection
- Voltage up to 300 V in accordance with UL
- Available in 11 colors
- Can be bridged and aligned with standard jumpers
- Testing option for all common test probes

|  Web code: #2130 |  |  |  |  |  |  |

Pluggable terminal blocks with Push-in connection

Modular and compact

Pluggable, multi-level COMBI terminal blocks allow you to carry out mounting and startup with flexibility and to save space. From the control box to the complete system, it is impossible to imagine today's modular applications without pluggable solutions.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Optimum cable entry, thanks to an angled design
- ✓ Clear marking, thanks to a central marking surface for each level
- ✓ Space saving, thanks to compact terminal design which is just 3.5 mm wide
- ✓ Simple potential distribution using the double bridge shaft

Main features

- Push-in connection
- Standard COMBI plug-in zone
- Integrated coding system
- Voltage: 500 V
- Current: 16 A
- Cross section up to 2.5 mm²

|  Web code: #2131 |  |  |  |  |  |  |

Sensor/actuator terminal blocks with Push-in connection

Connecting sensors in a way that saves space

The 3.5 mm wide sensor/actuator terminal blocks offer the option of connecting sensors with two signal outputs in a way that saves space. All sensor connections, including PE, are connected to just one terminal block.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Flexible feed-in and bridging with feed-in terminals with the same shape
- ✓ Clear marking, thanks to marking of all levels
- ✓ Time-saving conductor connection, thanks to tool-free Push-in direct connection technology
- ✓ Use of CLIPLINE complete standard accessories
- ✓ Space-saving wiring of bipolar sensors and actuators in just one terminal block

Main features

- Terminal block width: 3.5 mm
- Push-in connection
- Connection for bipolar sensors
- Maximum signal density
- Voltage: 250 V
- Current: 13.5 A

|  Web code: #2132 |  |  |  |  |  |  |

Disconnect terminal blocks with Push-in connection

Safe and convenient disconnection

The disconnect terminal blocks with Push-in connection feature easy operation of the connection technology and the disconnect element. The switching state can be clearly identified at any time. The disconnect terminal blocks can be fed up to 32 A and are designed for voltages up to 1000 V.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Tool-free wiring of rigid and flexible conductors
- ✓ Safe and simple testing option, thanks to integrated 4 mm test sockets
- ✓ Flexible potential distribution, thanks to bridge shafts on both sides
- ✓ Robust design of the isolating plugs and disconnect knives enables use in harsh environments
- ✓ Flat marking surfaces enable easy identifiability in any installation position

Main features

- Push-in connection
- Voltage: 1,000 V
- Current: 32 A
- Nominal cross section of flexible conductors: 6 mm²
- Nominal cross section of rigid conductors: 10 mm²
- Pitch width: 10.2 mm
- 180° isolating plug is pluggable in the park position
- Isolating plug with small color plates for visualizing the switching state

|  Web code: #2133 |  |  |
|---|---|---|
| Description | Disconnect terminal block | Knife disconnect terminal block |
| Disconnect element | Isolating plug | Disconnect lever |
| Type | PT 6-T P/P HV | PT 6-MT P/P HV |
| Order No. | 1028589 | 1028591 |

High-current terminal blocks with Power-Turn connection

Convenient connection of large conductors

The PTPOWER high-current spring-cage terminal blocks with Power-Turn connection technology offer today's fastest and most user-friendly connection option for wiring large conductors of up to 185 mm².

Power-Turn Technology
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Fast and easy connection, thanks to Power-Turn technology
- ✓ Easy voltage pick-off, thanks to optional retrofittable terminal blocks
- ✓ Flexible mounting, thanks to DIN rail or direct mounting variants
- ✓ Reduced mounting costs, thanks to pre-assembled terminal block bases
- ✓ Reduction in logistics costs with the uniform CLIPLINE complete system accessories

Main features

- Power-Turn connection technology
- Voltage: 1,500 V
- Current: 309 A
- Conductor cross section: 95 mm² ... 185 mm²

|  Web code: #2134 |  | |  | |
|---|---|-----------------|---|------------------|

Fuse terminal blocks with Push-in connection

Simple protection of all applications

The screw cap fuse terminal blocks are the perfect addition to the existing product range. They are suitable for type G 5 x 20 mm fuse-links and also available as a variant with a triggering state indicator. Their design makes them extremely robust and versatile.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Easily accessible fuse-links for convenient replacement
- ✓ Potential distribution, thanks to continuous function shafts
- ✓ Convenient testing, thanks to test points on both sides
- ✓ Identification of defective fuses, thanks to the LED display

Main features

- Push-in connection
- Voltage: 1,000 V
- Current: 10 A
- Fuse size: 5 x 20 mm
- Nominal cross section of flexible conductors: 6 mm²
- Nominal cross section of rigid conductors: 16 mm²
- Pitch width: 12.2 mm
- Seal: twist caps

| | | |

| Order No. | 3025042 | 3025044 |

Fuse terminal blocks with screw connection

Simple protection of all applications

UK lever-type fuse terminal blocks provide the right fuse holder for various applications. With up to 32 A and a power dissipation of up to 4 W, they are perfect for demanding standard or photovoltaic applications up to 1,000 V.

Your advantages

- ✓ Photovoltaic variant up to 1,000 V in accordance with IEC 60269-6
- ✓ Easily accessible fuse openings
- ✓ Convenient replacement of fuse-links
- ✓ Quick identification of faulty fuses, thanks to LED status indicator
- ✓ Easy to bridge

Main features

- Conventional screw connection
- DC voltage: 1,000 V
- Current: 32 A
- Power dissipation of up to 4 W possible
- The spacer can be used for higher thermal loads

|  Web code: #2137 |  |  |  |  |  |  |

Compact plug-in test system

Easy and safe testing

The FAME 3 SL plug-in test system is a compact variant that has been added to the existing FAME 3 system. It features simplified snap-in mounting of the plug-in test sockets in the mounting wall. The coded and lockable test plug has a design that saves a significant amount of space.

COMPLETE line

Your advantages

- ✓ Easy and time saving, thanks to functional grouping of switching operations
- ✓ Maximum safety, thanks to automatically leading transformer short circuit
- ✓ Compact testing block and plug design for space-saving wall installation
- ✓ Reliable test procedure, thanks to coded and lockable plug design
- ✓ Fast assignment of the function using color coding

Main features

- Voltage: 400 V
- Current: 30 A
- Barrier connection technology for ring and fork-type cable lugs
- Transformer short circuit with standard jumpers for free assembly
- Number of positions: modular up to 6 positions

|  Web code: #2138 |  |  |  |  |  |  |
|---|---|---|---|--|---|---|
| Description | Plug-in test socket | | | Test plug | | |

Plug-in test system for 19" module carrier

Easy and safe testing

Up to eight FAME RACK plug-in test sockets can be installed in 19" module carriers in accordance with IEC 60297-3. The plug-in test socket and test plug feature barrier connection technology for ring cable lugs, have a modular design, and use CLIPLINE complete system accessories.

COMPLETE line

Your advantages

- ✓ Time saving, thanks to functional grouping of switching operations
- ✓ High level of safety, thanks to automatically leading transformer short circuit
- ✓ Reliable test procedure, thanks to connection points for plug actuation
- ✓ Fast mounting, thanks to prefabricated modules for two, three, and four rack units in a 19" rack
- ✓ Space saving, thanks to the compact design and offset test socket arrangement

Main features

- Voltage: 400 V
- Current: 24 A
- Barrier connection technology with screws for ring or fork-type cable lugs
- Transformer short circuit and star point bridging with standard jumpers
- Number of positions: modular up to 18 positions
- Cover with or without status contact
- Space saving: eight plug-in test sockets in a 19" rack

| | | | | | |
|---|---|---|--|---|---|
|  Web code: #2139 |  |  |  |  |  |

Connector housings for crimped contacts

Modular and compact

You can insert compact CP connector housings for standardized module socket contacts on all COMBI basic terminal blocks of the CLIPLINE complete terminal block system. Optionally, latches and strain relief devices can be attached.

COMPLETE line

Your advantages

- ✓ Time-saving production and commissioning in modular systems manufacturing
- ✓ Optimum option for combining terminal blocks and couplings with preassembled cable harnesses
- ✓ Ideal for fully automated cable harness production and connector housing assembly
- ✓ Can be integrated into the digital work cycles for system production
- ✓ Ideal for conductor processing with automated crimp processes

Main features

- Conductor cross section: 1.5 mm² ... 2.5 mm²
- Number of positions: 2, 3, 4, 6, 8, and 10
- Pitch width: 5.1 mm
- Field of application: pluggable 2.5 mm² terminal blocks

|  Web code: #2135 |  |  |  |  |

Universal terminal blocks for aluminum conductors

Fast installation, easy and safe

Aluminum and copper wires can be used in UBAL universal terminal blocks. Pre-lubricated contact cavities simplify connection of aluminum conductors and ensure that no maintenance is required for the screw connection.

Your advantages

- ✓ Suitable for rigid and multi-stranded aluminum and copper wires
- ✓ Simplified assembly process, thanks to antioxidants in the terminal points
- ✓ High level of safety, thanks to shock-proof caps for conductive clamping parts
- ✓ Optimum conductor connection with a high level of tightening torque, thanks to the Allen screw
- ✓ Can be mounted on the standard DIN rail (except UBAL 240) or directly on the mounting plate

Main features

- Tested for short circuits in accordance with EN 61238-1 Class A
- Voltage: 1,000 V
- Operating temperature: 90°C
- Aluminum conductor cross section: 6 mm² ... 240 mm²
- Copper conductor cross section: 2.5 mm² ... 240 mm²
- Clamping part made of tin-plated aluminum
- UL-approved

|  Web code: #2140 |  |  |  |  |
|---|---|---|--|---|

Pre-assembled M8 cables with D-coding

Secure and reliable data transfer

The M8 product range transmits data reliably through symmetrically arranged contacts. Compared to M12 connectors, you save up to 30% of the installation space. The Advanced Shielding Technology ensures an extremely reliable and robust shield connection.

Advanced Shielding Technology[®]

Designed by PHOENIX CONTACT

Ethernet

Your advantages

- ✓ Ethernet and PROFINET even in the smallest devices, thanks to compact connector dimensions
- ✓ Reliable and vibration-resistant 360° shield transition
- ✓ Space savings, thanks to Power over Ethernet: field devices are supplied with data and power simultaneously

Main features

- D-coding with symmetrically arranged contacts
- 4-pos.
- Conductor cross section: 0.34 mm²
- Degree of protection: IP65, IP67
- Suitable for 100 Mbps CAT5
- PoE-capable up to 4 A with a maximum of 60 V
- Standardized in accordance with IEC 61076-2-114

|  Web code: #2150 | | | | |

D-coded M8 device connectors

Data transmission for Ethernet and PROFINET

Two-piece device connectors with D-coding extend the portfolio of M8 circular connectors for data transmission. The SMD-capable connectors with IP67 degree of protection are suitable for data transmission up to 100 Mbps in Ethernet and PROFINET environments.

Ethernet

Your advantages

- ✓ Transmit high data rates in a confined space, ideal for compact devices
- ✓ Designed for integration into the SMT soldering process
- ✓ Packaging available for automated pick-and-place assembly
- ✓ Thread or press-in housings enable easy integration of the mechanical port screw connection
- ✓ Sealed tight by optional additional O-ring

Main features

- Pin assignment: 4-pos., D-coded
- Currents for 4 A
- Voltages up to 60 V
- Standard IEC 61076-2-114
- Black insulating body (other color on request)
- CAT5 in accordance with IEEE 802.3
- Power over Ethernet
- Shielded or unshielded versions
- Degree of protection: IP67 (when plugged in)

|  Web code: #0237 |  |  |  |  |  |

*For automated pick-and-place assembly, available in tray packing on request.

Pre-assembled M12 data cables

Shielding concept for secure data transmission

Advanced Shielding Technology is the innovative shielding concept for pre-assembled data cables. Liquid metal that completely encloses the cable shielding during the manufacturing process guarantees improved, robust shielding and expansion of the power reserves.

Advanced Shielding Technology[®]

Designed by PHOENIX CONTACT

Ethernet CC-Link IE 10 Gb/s

Your advantages

- ✓ Increased resistance to environmental influences under extreme conditions such as lightning strikes
- ✓ Secure 360° shield connection under high mechanical loads
- ✓ Reliable EMC protection with an extremely low-impedance connection of < 1 mΩ
- ✓ More flexibility, thanks to expansion of the cable compatibility
- ✓ Space savings, thanks to a more compact design of the connectors

Main features

- X-coding with consistent pair shielding
- 8-pos.
- Degree of protection: IP67
- Suitable for 10 Gbps CAT6_A
- PoE-capable up to 0.5 A with a maximum of 60 V
- Standardized in accordance with IEC 61076 2-114

M12 POWER connectors for assembly

Compact crimp connection

M12 POWER connectors for assembly offer maximum power in a minimal design. The extremely compact crimp connection enables manual and automatic connection if a large number of cables has to be assembled.

Your advantages

- ✓ Powerful: DC and AC applications up to 16 A and 690 V
- ✓ Extremely compact, thanks to the small wiring space and high contact density
- ✓ Safely shielded: reliable shield connection even under extreme mechanical strain
- ✓ Robust connection: suitable for railway applications with high shock and vibration loads
- ✓ Protected seal in the M12 female

Main features

- Crimp connection
- Metal housing
- 360° shielded connectors
- Protected seal in the M12 female
- Conductors may get crossed

Panel feed-throughs with Push-in connection

Easy installation without connectors

The panel feed-throughs for the IPD installation system enable quick and easy installation with Push-in spring connection on the field and device side. There is no connector on the field side. Simply snap the sleeve into place, and the cable is connected.

Push-in Technology[®]
Designed by PHOENIX CONTACT

Your advantages

- ✓ Fast cable connection without connectors
- ✓ Easy, tool-free installation with Push-in connection
- ✓ Ideal for use outside and in wet areas, thanks to IP67
- ✓ Convenient handling, even in areas that are difficult to access

Main features

- Push-in connection
- Voltage: 690 V
- Currents up to 20 A
- Conductor cross section: 0.5 mm² ... 2.5 mm²
- Degree of protection: IP67, IP68
- Shock resistance: IK07

Connectors for assembly

Simple motor connection

You can use the connectors for assembly to connect motors in a fast, straightforward manner without special tools. Thanks to IP54, your installation is protected against splash water and dust for particularly reliable cabling in outdoor areas, such as on marquees and shutters.

Your advantages

- ✓ Time savings of up to 80% for on-site connection
- ✓ Quick and easy assembly without special tools
- ✓ Highly reliable, thanks to robust and vibration-proof housings

Main features

- QUICKON fast connection technology (IDC)
- 4-pos. (3-pos. + PE)
- Voltage: 400 V
- Currents up to 17.5 A
- Degree of protection: IP54
- Shock resistance: IK07

Modular contact inserts for heavy-duty connectors

Easy wiring of high-voltage applications

The contact insert product range now includes Push-in Technology, thanks to the addition of modular Push-in contact inserts for high-current applications up to 16 A. Previously, these applications could be performed only with traditional crimp connections.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Easy, tool-free installation with Push-in connection
- ✓ Space savings and high packing density, thanks to compact terminal chambers
- ✓ Connection-compatible with other connection technologies, such as crimp connection or axial screw inserts
- ✓ Highly compact modular interface, thanks to the combination of various transmission media in one housing

Main features

- Push-in connection
- Material: PC
- Suitable for B series housings (EVO, STANDARD, and ADVANCE)
- Connection-compatible with the market standard

Contact inserts for heavy-duty connectors

Easy wiring of high-position applications

With the high-position Push-in contact inserts, you can easily connect up to 46 signal contacts in one B24 connector. The particularly compact terminal chamber enables a high packing density, which was previously only possible with traditional crimp connections.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Easy, tool-free installation with Push-in connection
- ✓ Space savings and high packing density, thanks to compact terminal chambers
- ✓ Comprehensive range with the right Push-in insert for every size
- ✓ Connection-compatible with other connection technologies, such as crimp connection
- ✓ Protection against mismatching, thanks to coding with plastic profiles

Contact inserts for compact heavy-duty connectors

More safety, thanks to an innovative PE connection

HEAVYCON COM contact inserts reliably transfer signals and power. The new grounding concept with a leading PE connection outside of the contact insert ensures greater safety. The compact design of the COM series also enables use in decentralized attachments.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Easy, tool-free installation with Push-in connection
- ✓ Space savings and high packing density, thanks to compact terminal chambers
- ✓ Safe, thanks to touch protection and leading PE connection outside of the contact insert
- ✓ Connection-compatible with other connection technologies, such as crimp connection

Compact heavy-duty connector housings

Reliable cabling of decentralized attachments

The new HEAVYCON COM housings have a compact design. The extensive product range of metal and plastic products enables easy and reliable cabling of decentralized attachments in automation technology.

COMPLETE line

Your advantages

- ✓ Space savings, thanks to compact design
- ✓ High level of safety: extremely resistant materials and high protection classes
- ✓ Protection against electromagnetic interference: metal housings are EMC ready, thanks to conductive surfaces and seals
- ✓ Maximum corrosion resistance, thanks to high-quality die-cast aluminum

Main features

- Interlock with plastic latch
- Sealing material: NBR
- Degree of protection: IP66, IP67

Heavy-duty connectors with more wiring room

Ideal for modular applications

The new, high HEAVYCON STANDARD housings from the B series provide more room for wiring large cable diameters and wiring bundles for modular applications. They are made of high-quality corrosion-resistant aluminum and are suitable for EMC applications.

COMPLETE line

Your advantages

- ✓ More wiring room for large cable diameters and wiring bundles, thanks to a higher housing and larger M50 cable outlets
- ✓ Maximum corrosion resistance, thanks to high-quality die-cast aluminum
- ✓ Reliable EMC protection, thanks to conductive surfaces and seals
- ✓ Connection-compatible with the market standard

Main features

- Housing material: corrosion-resistant die-cast aluminum

RJ45 contact inserts for heavy-duty connectors

Compact data transmission with D7 housing

Using the RJ45 contact inserts for HEAVYCON D7 housings, you can integrate RJ45 data cables easily into your application in a highly compact space. Metal and plastic connector housings with a high degree of protection ensure secure and reliable data transmission.

Ethernet

EtherCAT

Your advantages

- ✓ Data transmission in the most compact space, thanks to a compact D7 design
- ✓ High-speed data transmission up to 10 Gbps
- ✓ Suitable for pre-assembled data cables
- ✓ Quick and easy cabling, thanks to a tool-free RJI connection

Main features

- Size: D7
- Material: PC
- Contact material: copper alloy
- Suitable for 10 Gbps CAT6_A

PRC series inverted circular connectors

For flying leads with a high degree of protection

Inverted circular connectors from the PRC series enable reliable cable-to-cable connections in building, industrial, and outdoor applications. Thanks to weatherproof materials and the high degree of protection up to IP69K, the connectors transmit high currents even in demanding ambient conditions.

Your advantages

- ✓ Up to 75% smaller than industrial connectors with the same rating
- ✓ Locking mechanism unlocked manually or using a tool
- ✓ Suitable for applications in atmospheres containing salt and in direct sunlight
- ✓ Ideal for indoor and outdoor use, thanks to the use of weatherproof materials

Main features

- Conductor cross sections: 1.5 mm² ... 6 mm²
- Rated voltage: 690 V AC (III/3)
- Rated current: 35 A
- Degree of protection: up to IP69K
- For assembly in the field
- 3- to 5-pos.
- Can be color-coded

PRC series angled circular connectors

Flexible device and field connection

Basic housings for device and field use extend the portfolio of PRC series circular connectors. Three different angles and a modular system provide greater flexibility during installation. Assembly is by means of 3- or 5-pos. screw connection heads with pin or socket contact.

Your advantages

- ✓ Versatile interfaces, thanks to straight and angled connector housings
- ✓ Universal accommodation of existing connector heads with screw connection technology
- ✓ Modular system for optimized storage
- ✓ Locking mechanism unlocked manually or using a tool
- ✓ Ideal for indoor and outdoor use, thanks to the use of weatherproof materials

Main features

- Rated current: 35 A
- Rated voltage: 690 V AC (III/3)
- Degree of protection: up to IP69K
- Field connectors can be set at 45° and 90° angle
- Device connectors can be set at 0°, 45°, and 90° angle
- Can be color-coded

Compact card printer for industry

Flexible marking with thermal transfer printing

The THERMOMARK CARD 2.0 prints markers supplied in card format for all industrial applications. The proven thermal transfer printing technology provides high-quality results. The integrated color touch display makes operation intuitive and uncomplicated.

Your advantages

- ✓ Simple and intuitive operation using the color touch display
- ✓ Maintenance-free operation with proven thermal transfer printing technology
- ✓ No waiting period, with just 8 seconds of printing time per card
- ✓ Optimum print settings, thanks to automatic material detection
- ✓ Easy and flexible activation, thanks to PROJECT complete software

Main features

- Display: color touch display
- Print resolution: 300 dpi
- Max. printing width: 105 mm
- Weight: approx. 6 kg
- Interfaces: Ethernet 10/100 Mbps/USB 2.0/RS-232
- Service: integrated operating videos
- Approvals: UL/CSA, CCC, FCC Class A, CB, EAC

| | |
|---|--|
|  Web code: #2141 |  |
| Description | Thermal transfer printer |
| Type | THERMOMARK CARD 2.0 |
| Order No. | 1085267 |

Versatile, efficient roll printer

Markings for all industrial applications

The THERMOMARK ROLL 2.0 prints different marking materials in roll format for high-quality industrial identification. The clear symbols and the color touch display intuitively and conveniently guide the user through the printer menu.

Your advantages

- ✓ Simple and intuitive operation using the color touch display
- ✓ Flexible printing of punched or continuous adhesive labels, insertion labels, heat shrink tubes, and marking hoses
- ✓ Fast, high-quality, and durable results
- ✓ Versatile fields of application by processing material for terminal, wire, cable, equipment, and plant marking
- ✓ Easy and flexible activation, thanks to PROJECT complete software

Main features

- Display: color touch display
- Print resolution: 300 dpi
- Max. printing width: 105 mm
- Max. printing length: 1,000 mm
- Interfaces: Ethernet 10/100 Mbps/USB 2.0/RS-232
- Service: integrated operating videos
- Accessories: cutting and perforating unit

Oval marking hose in roll format

Self-adhesive wire and cable marking

The shrink-proof marking hoses in the WMS-OT HF... roll format mark conductors and cables. The large opening enables fast routing and marking. Thanks to its geometry, the hose automatically affixes to the conductor or cable and does not slide off.

Your advantages

- ✓ Ideal for marking conductors and cables in the railway industry, thanks to halogen-free material (approvals: DIN EN 45545-2 (R22/R23/R24:HL3))
- ✓ Rapid fitting onto the conductor or cable, thanks to the oval design and large opening
- ✓ Flexible cutting of the continuous material to the desired dimension by using the cutting or perforating unit

Main features

- Can be printed with THERMOMARK ROLL 2.0, THERMOMARK ROLL, THERMOMARK ROLLMASTER 300 and 600
- Material: polyolefin
- Temperature range: -30°C ... +125°C
- Wipe resistance in accordance with DIN EN 61010-1 (VDE 0411-1)
- Materials: free of silicone and halogen
- Not shrinkable

Markings for SIEMENS marker carriers

Self-adhesive markings for devices

The UCT4-EM(L)P... device markers are suitable for gluing into or latching into the marker carriers from the SIEMENS SIRIUS ACT 3SU... series. The sheets provide space for function texts. The wide temperature range means that the labels can be used in control cabinets as well as the field.

Your advantages

- ✓ Easy mounting, thanks to self-adhesive labels or easy latching
- ✓ Particularly durable, thanks to the high quality of the carrier material and marking
- ✓ Optimally coordinated material and marking ensure high-quality markings

Main features

- Can be printed with THERMOMARK PRIME, THERMOMARK CARD, BLUEMARK ID, BLUEMARK CLED and TOPMARK NEO
- Material: PC V0
- Flammability rating UL 94 V0
- Temperature range: -40°C ... +120°C
- Wipe resistance in accordance with DIN EN 61010-1 (VDE 0411-1)

White plastic markers for laser marking

High-quality marking, flexible assembly

The LS-EMLSP... product range includes self-adhesive double-layer plastic markers. In addition, the material has drilled holes for a simple and fast screw or rivet assembly.

Your advantages

- ✓ Fast and secure fastening, thanks to the assembly combination of gluing and screwing or riveting
- ✓ Long-lasting marking, since the marking is as resistant as the material itself
- ✓ Reduced processing time, thanks to pre-defined markers

Main features

- Can be printed using TOPMARK NEO and TOPMARK LASER
- Material: TRANSPLY-ABS
- Temperature range: -20°C ... +85°C
- Wipe resistance in accordance with DIN EN 61010-1 (VDE 0411-1)

Stainless steel labels for laser marking

Robust markings for harsh conditions

The LS-EMLP V4A... product range includes self-adhesive stainless steel markers with a high adhesive strength. The TOPMARK NEO labels the robust material, which guarantees a durable and high-quality industrial identification, even under extreme influences.

Your advantages

- ✓ Fast fastening, thanks to simple adhesive mounting
- ✓ Long-lasting marking, since the marking is as resistant as the material itself
- ✓ Maximum resistance to mechanical damage, thanks to a high-quality laser engraving

Main features

- Can be printed using TOPMARK NEO and TOPMARK LASER
- Material: stainless steel (V4A)
- Temperature range: -35°C ... +150°C
- Wipe resistance in accordance with DIN EN 61010-1 (VDE 0411-1)

Labels for the food industry

Detectable, strongly adhesive, and resistant

EML-D... is a detectable label for marking various types of equipment in controller, system, and control cabinet manufacturing applications in the food industry. Thanks to its high adhesive strength, it can be stuck onto rough, textured, and low-energy surfaces.

Your advantages

- ✓ Detectable, thanks to an integrated aluminum layer
- ✓ When combined with the TM-RIBBON 110-EX ink ribbon, it is highly resistant to solvents, aggressive cleaning agents, acetone, and ethanol
- ✓ Secure hold, even on textured and low-energy surfaces, thanks to high adhesive strength
- ✓ Suitable for use in the food industry in accordance with ISEGA approval

Main features

- Can be printed with THERMOMARK ROLL 2.0, THERMOMARK ROLL, THERMOMARK ROLLMASTER 300, THERMOMARK ROLLMASTER 600
- Material: polyester
- Temperature range: -40°C ... +120°C
- Wipe resistance in accordance with DIN EN 61010-1 (VDE 0411-1)
- Materials: free of silicone and halogen

Self-adhesive warning and hazard labels

Pre-printed for circuit marking

The colored, pre-printed system labels on a roll enable customized creation of circuit markings and warning and hazard notes. The labels consist of soft, highly flexible PVC film that molds itself to uneven surfaces.

Your advantages

- ✓ Good hold, even on uneven surfaces, since the highly flexible, soft PVC material adapts easily
- ✓ Resistance, even under harsh industrial conditions and against solvents with the use of high-quality ink ribbons
- ✓ Suitable for use indoors and outdoors, thanks to a large temperature range of -40°C to +90°C

Main features

- Can be printed with THERMOMARK ROLL 2.0, THERMOMARK ROLL, THERMOMARK ROLLMASTER 300, THERMOMARK ROLLMASTER 600
- Material: PVC
- Temperature range: -40°C ... +90°C
- Wipe resistance in accordance with DIN EN 61010-1 (VDE 0411-1)

Labels with protective laminate

Reliable protection against external influences

The EML-LPR... labels feature a protective laminate, which is stuck onto the printing surface after the printed base label has been attached. This protects it from external influences. The strong adhesive also enables a secure hold, even on rough and textured surfaces.

Your advantages

- ✓ Resistance of the marking to external influences, thanks to the protective laminate
- ✓ Secure hold, even on textured surfaces such as control cabinet panels, thanks to the strong adhesive
- ✓ Easy handling, thanks to punched laminate

Main features

- Can be printed with THERMOMARK ROLL 2.0, THERMOMARK ROLL, THERMOMARK ROLLMASTER 300, THERMOMARK ROLLMASTER 600
- Material: polyester
- Temperature range: -40°C ... +150°C

Narrow electronic circuit breakers

Universal at 6 mm

The PTCB electronic circuit breakers are now available as a 1 A and 8 A variant. They are ideal for simple and space-saving potential distribution. You can combine the narrow, single-channel devices with the CLIPLINE complete terminal block system.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Simple application setup, thanks to the capability of bridging to the CLIPLINE complete terminal block range
- ✓ More space in the control cabinet: slim-line protection with a width of just 6 mm
- ✓ Flexible use, thanks to fine nominal current increments for a wide variety of applications

Main features

- Overall width: 6 mm
- Determination of operating state via LED display in traffic light colors
- Fixed nominal current
- Satisfies requirements in accordance with NEC Class 2
- Flexible use
- Integrated remote signaling function

| i Web code: #2181 |  |  |
|--|---|---|
| Description | Device circuit breaker with fixed nominal currents | |
| Nominal current | 1 A | 8 A |
| Operating voltage | 18 V DC ... 30 V DC | |
| NEC Class 2 | Yes | No |

| Type | PTCB E1 24DC/1A NO | PTCB E1 24DC/8A NO |
| Order No. | 2909902 | 2909910 |

Multi-channel electronic circuit breakers

Remote reactivation

The two new variants of the CBMC ... S-R multi-channel electronic circuit breakers have a status output and reset input. This allows the status of the devices to be monitored remotely and tripped channels to be switched on again.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Easy device replacement, thanks to the compact design and options for individual adjustments
- ✓ Circuits can be adjusted tool-free via single-button operation of the LED push buttons
- ✓ Enhanced diagnostic and control options, thanks to integrated status output and reset input
- ✓ Optimum protection for cables and sensors as well as NEC Class 2 circuits by means of an additional internal output fuse

Main features

- Four independent channels
- Nominal current adjustable in 1 A increments
- Status output and reset input
- Individual marking options
- Electronic protection against overload and short-circuit currents
- Rated voltage: 24 V DC
- Push-in connection

| | | |

| Order No. | 1065727 | 1065729 |

Multi-channel electronic circuit breakers

Safe disconnection with electrical isolation

When switched off, the outputs of the new CBMC EG4 multi-channel electronic circuit breaker are electrically isolated. This ensures that there is no connection to the power supply when they are disconnected, and the current path is fully disconnected in the event of a fault.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Easy device replacement, thanks to the compact design and options for individual adjustments
- ✓ Circuits can be adjusted tool-free via single-button operation of the LED push buttons
- ✓ System safety is increased during maintenance work, thanks to disconnection via electrical isolation
- ✓ Reliable protection against unintentional adjustment of current values, thanks to electronic locking

Main features

- Four independent channels
- Nominal current adjustable in 1 A increments
- Electrical isolation
- Floating remote indication contact
- Individual marking options
- Electronic protection against overload and short-circuit currents
- Rated voltage: 24 V DC
- Push-in connection

| Order No. | 1065730 |

Fuse carriers for selective protection

Optional protection from overcurrent

The new fuse carrier for TERMITRAB complete offers additional protection for your installation. Implement selective protection of your signal lines to guard them from overcurrents in a compact space. Simply use conventional 5x20 mm fine fuses to do so.

COMPLETE line

Your advantages

- ✓ Simple protection, thanks to the use of conventional 5x20 mm fine fuses
- ✓ Maximum space savings, thanks to direct installation on the protective device
- ✓ High degree of application flexibility, thanks to easy retrofitting capability
- ✓ Modular overcurrent protection, can be combined easily with surge protection

Main features

- For conventional 5x20 mm fine fuses
- Can be combined with TTC screw versions
- Can be used with all multi-level TTC products, including knife disconnection

|  Web code: #2189 |  |
|---|--|
| Description | Fuse carrier |
| Fuse type | 5x20 mm fine fuse |
| Dimensions W x H x D [mm] | 6.2 x 37 x 39 |
| Type | TTC-6-FC-UT |
| Order No. | 1054762 |

Pluggable surge protection

Protection for resistance-dependent measurements

The new TERMITRAB complete product range versions offer protection for resistance-dependent measurements in 3-conductor applications. Two different voltage versions are added to the product portfolio for this application.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Space saving, thanks to the narrow overall width of just 6 mm
- ✓ Versatile use, thanks to the application of adapted designs and connection technologies
- ✓ Safe disconnection and signaling in the event of overload
- ✓ Simple testing and documentation, thanks to pluggable protective modules
- ✓ High level of nominal current, thanks to impedance-free mode of protection

Main features

- Overall width: 6 mm
- Pluggable
- Mechanical status indicator on the device
- Remote signaling capability
- Impedance-free mode of protection
- Plugs can be tested with CHECKMASTER 2

| | | | | |

One-piece surge protection

Protection for interfaces and signal circuits

More single-level protective devices are now being added to the TERMITRAB complete product range. They offer protection for binary signal circuits with two signal wires and telecommunications interfaces with three signal wires.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Space saving, thanks to the narrow overall width of just 6 mm
- ✓ Versatile use, thanks to the application of adapted designs and connection technologies
- ✓ Coordinated protective effects, thanks to versions with coarse, medium or fine protection
- ✓ Safe disconnection and signaling in the event of overload

Main features

- Overall width: 6 mm
- Mechanical status indicator on the device
- Remote signaling capability

| | | |
|---|---|---|
|  Web code: #2185 |  |  |
| Description | Surge protection for three signal wires with common reference potential | Surge protection for two signal wires with common reference potential |

| Rated current | 600 mA | 6 A |
| Connection technology | Push-in | |
| Type | TTC-6-3-HF-12DC-PT | TTC-6-2XTVSD-12DC-PT |
| Order No. | 1065316 | 2906807 |

Surge protection for Ex i signal circuits

Reliable protection of 3-conductor measurements

The new TERMITRAB complete product version offers protection for 3-conductor measurements in potentially explosive applications. In the event of maintenance or a fault, the pluggable protective devices enable impedance-neutral connection and disconnection.

COMPLETE line

Your advantages

- ✓ Can be used in intrinsically safe signal circuits
- ✓ Space saving, thanks to the narrow overall width of just 6 mm
- ✓ Safe disconnection and signaling in the event of overload
- ✓ Secure positioning in the base element, thanks to coordinated latching hook
- ✓ Simple testing and documentation, thanks to pluggable protective modules

Main features

- ATEX and IECEx approval
- Overall width: 6 mm
- Mechanical status indicator on the device
- Pluggable
- Plugs can be tested with CHECKMASTER 2
- Optional remote signaling capability
- Impedance-free mode of protection

|  Web code: #2187 |  |  |
|---|---|---|
| Description | Surge protective device for 3-conductor measurements in the Ex area | Replacement plug |
| Application | Resistance-dependent measurements | |
| Nominal voltage | 24 V DC | |
| Rated current | 5 A | |

| Type | TTC-6P-3-EX-24DC-UT-I | TTC-6P-3-EX-24DC-I-P |
| Order No. | 1064665 | 1064663 |

Surge protection for Ex i signal circuits

Protection of current loops and analog signals

The new TERMITRAB complete product version offers protection for current loops and analog signals in potentially explosive applications. In the event of maintenance or a fault, the pluggable protective devices enable fast testing and replacement.

COMPLETE line

Your advantages

- ✓ Can be used in intrinsically safe signal circuits
- ✓ Space saving, thanks to the narrow overall width of just 6 mm
- ✓ Safe disconnection and signaling in the event of overload
- ✓ Secure positioning in the base element, thanks to coordinated latching hook
- ✓ Simple testing and documentation, thanks to pluggable protective modules

Main features

- ATEX and IECEx approval
- Overall width: 6 mm
- Mechanical status indicator on the device
- Pluggable
- Plugs can be tested with CHECKMASTER 2
- Optional remote signaling capability

| | |

| Application example | 4 ... 20 mA current loop |
| Nominal voltage | 24 V DC |
| Rated current | 600 mA |
| Connection technology | Screw |
| Type | TTC-6P-1X2-EX-24DC-UT-I |
| Order No. | 1065312 |

Surge protection for MCR technology

Protecting signals and interfaces

New products for various voltage and circuitry versions are now available for the TERMITRAB complete product range. The devices protect almost all standard interfaces used in measurement and control technology.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Simple testing and documentation, thanks to pluggable protective modules
- ✓ Space saving, thanks to the narrow overall width of just 6 mm
- ✓ Safe disconnection and signaling in the event of overload
- ✓ Variable connection technology
- ✓ High degree of flexibility, thanks to the large variety of products

Main features

- Pluggable
- Overall width: 6 mm
- Nominal voltage: 24 V DC
- Mechanical status indicator on the device
- Remote signaling capability
- Push-in or screw connection
- Plugs can be tested with CHECKMASTER 2

| i Web code: #2186 | | | | | | |

Intelligent monitoring system

Clear insight into the system

ImpulseCheck is the world's first intelligent assistance system for surge protection in the field of mains protection. The module allows you to measure the state of health of every single protective device via cloud connection and provides new digital services.

COMPLETE line

Your advantages

- ✓ Keeping the pulse of your system: register the state of the system and detect the remaining state of health of the SPDs
- ✓ Always on the safe side: status reports complying with standards, at any time at the push of a button
- ✓ Benefit from digital added value and services: cloud-based data acquisition and the ability to display and combine measured values support completely new automated processes

Main features

- Configuration of the device via web interface and PROFICLOUD
- Measurement of amperage, charge, and specific energy
- Real-time detection of surge and burst pulses
- Cloud-based notification when there is a change in status

|  <p>i Web code: #2196</p> | |  |  |
|---|--|--|---|

| Order No. | 1045379 | 1045380 | 1069191 |

Surge protection for 40 mm rails

Standard-compliant protection

The FLT-SEC-ZP is the combined lightning current and surge arrester for protecting residential buildings and multi-purpose buildings. You save time and space, thanks to the narrow overall width and tool-free assembly. Benefit from a practical base latch, which makes it possible to latch onto busbars of all thicknesses.

Your advantages

- ✓ Fast and error-free installation, thanks to direct mounting on 40 mm rail system
- ✓ Fits in every installation distributor, thanks to extremely narrow overall width
- ✓ Mounts securely and without tools through a universal interlock on a 5 mm and 10 mm busbar thickness
- ✓ No line follow current, thanks to an innovative spark gap

Main features

- Narrow overall width of just 47 mm
- Test button for state monitoring
- Additional protective conductor terminal point
- Free of leakage current, suitable for use in the unmetered area
- Low voltage protection level of 1.5 kV
- Test button for electrical status indicator
- Fulfills all requirements in accordance with DIN VDE 0100-534

| | | | | |
|---|---|---|---|---|
|  Web code: #2197 |  |  |  |  |
| Description | T1+T2 combined lightning current and surge arrester 7.5 kA discharge capacity | | T1+T2 combined lightning current and surge arrester 12.5 kA discharge capacity | |

Surge protection for power supplies

Powerful and space-saving

The slimmest type 2 surge protective device in the world VALVETRAB-SEC is now also available as a 4+0 version for TN-S and IT power supply systems. With its compact design and high performance, this solution offers comprehensive protection with minimum space requirements.

COMPLETE line

Your advantages

- ✓ Uninterrupted protection for your system, thanks to a secure disconnect device and high-value components
- ✓ Space-saving installation, thanks to compact design and fuse-free use up to 315 A with stub wiring
- ✓ Easy replacement during servicing, thanks to consistently pluggable protective devices
- ✓ High system availability, thanks to high-performance protective circuit
- ✓ No mismatching of plugs, thanks to mechanical coding

Main features

- Floating remote indication contact
- Visual mechanical status indicator
- Plugs can be tested with CHECKMASTER 2
- Extremely narrow design, just 12 mm per position
- Low voltage protection level of 1.9 kV for 400/690 V AC systems
- Varistor arrester with a low leakage current

| | |
|---|--|
|  Web code: #2195 |  |
| Description | Type 2 surge protective device |
| Network type | TN-S/IT |
| Nominal voltage | 400/690 V AC (TN-S)/ 400 V AC (IT) |
| Nominal discharge current | 20 kA |
| Discharge surge current | 40 kA |
| Type | VAL-SEC-T2-4+0-440-FM |
| Order No. | 1076468 |

Surge protection in the socket

Protection of valuable end devices in the building

BLOCKTRAB BLT-T3 is the compact surge protective device for universal assembly. The protective device is ideal for use in device sockets, cable ducts, and underfloor systems. As part of the fixed installation, the protection is concealed.

Your advantages

- ✓ Can be used universally, thanks to a compact design
- ✓ Concealed surge protection, thanks to device flush-mounted socket
- ✓ Cannot be stolen, since it is part of the fixed installation

Main features

- Compact design
- Protects end devices around the perimeter of the 10 m cable length
- Audible fault alarm
- Shock protection in accordance with IP20
- Thermal disconnect device

| | |
|---|--|
|  Web code: #2194 |  |
| Description | Type 3 device protection for universal assembly |
| Nominal voltage | 230 V |
| Nominal discharge current | 4 kA |
| Combined surge | 6 kV |
| Voltage protection level | ≤ 1.5 kV |
| Type | BLT-T3-230-A |
| Order No. | 1038841 |

- ✓ Easy retrofitting thanks to compact design
- ✓ Flexible mounting, thanks to integrated elongated holes
- ✓ High electric strength due to double insulation
- ✓ Wide range of possible applications, thanks to wide voltage range

- Branch or through-wiring connection
- Reinforced isolation
- Visual mechanical status indicator
- Low voltage protection level
- Corresponds to arrester classes type 2 and type 3
- Easy installation

Surge protection for photovoltaic systems

Simply increasing the system availability

The new type 1+2 VALVETRAB MS combined lightning current and surge arresters are now available with a 3+V circuit. They can be used in insulated DC voltage systems up to 1,000 V DC and offer you optimum protection for your photovoltaic application.

Your advantages

- ✓ Increased operational safety, thanks to high short-circuit current rating
- ✓ Protection against incorrect connection, thanks to coded plugs and base elements
- ✓ High system availability, thanks to high-performance protective circuit
- ✓ Easy replacement during servicing, thanks to consistently pluggable protective devices

Main features

- High short-circuit current rating
- Visual mechanical status indicator
- With or without floating remote indication contact
- Plugs can be tested with CHECKMASTER 2
- Screw connection
- Very powerful with a high discharge capacity

| | | |
|---|---|---|
|  Web code: #2192 |  |  |
| Description | Surge protective device with remote indication contact | Surge protective device without remote indication contact |
| Short-circuit current rating | 2,000 A | |
| Total discharge surge current | 10 kA | |
| Voltage protection level | ≤ 3.50 kV | |
| Remote indication contact | Yes | No |
| Type | VAL-MS-T1/T2 1000DC-PV/3+V-FM/32 | VAL-MS-T1/T2 1000DC-PV/3+V/32 |
| Order No. | 1044182 | 1044183 |

Base element for surge protection plug

Space-saving assembly on the printed-circuit board

The new VAL-MS-BE PCB base element is designed for direct mounting on a printed-circuit board. It is also designed for all protection plugs from the VALVETRAB MS product series. You can use the compatible protection plug to provide protection right on the printed-circuit boards of inverters.

Your advantages

- ✓ Remote signaling options due to floating remote indication contact
- ✓ Flexible use, thanks to an extensive portfolio of protection plugs
- ✓ Minimal space required, thanks to the small footprint
- ✓ Simple coding at first-time connection of the protection plug
- ✓ Fulfills the requirements in accordance with IEC 62109-1, thanks to double insulation

Main features

- Can be used at altitudes up to 5,000 m
- Can be soldered directly to the PCB
- Can hold type 1 and type 2 protection plugs
- Suitable for photovoltaic applications
- Double insulation between the remote signaling and main circuits
- Satisfies requirements in accordance with IEC/EN 61643-11

| | |
|---|--|
|  Web code: #2190 |  |
| Description | Base element for the printed-circuit board |
| Maximum continuous voltage | 760 V AC/1,500 V DC |
| Operating temperature | -40°C ... +85°C |
| Maximum altitude | 5,000 m |
| Maximum backup fuse | 250 A (gG) |
| Type | VAL-MS-BE-PCB-FM |
| Order No. | 1035864 |

Surge protection for photovoltaic systems

Optimal protection with the lowest space requirements

The new type 2 surge protective devices of the PRINTRAB product line can be mounted directly on the PCB. Thanks to their compact design, they are the ideal protective device for inverters. Soldered directly to the main board, they offer powerful protection in the smallest installation space.

Your advantages

- ✓ Minimal space required, thanks to the small footprint
- ✓ Remote signaling options due to floating remote indication contact
- ✓ Optimal protection, thanks to mechanical disconnection in the event of overload
- ✓ Fulfills the requirements in accordance with IEC 62109-1, thanks to double insulation

Main features

- Can be used at altitudes up to 5,000 m
- Operating temperature: -40°C ... +85°C
- Can be soldered directly to the PCB
- Designs with 10 kA and 20 kA nominal discharge current
- Can be used without backup fuse up to a maximum of 2000 A
- Products for AC and DC applications

| | | |
|---|---|---|
|  Web code: #2191 |  |  |

| Nominal voltage | - | 690 V AC |
| System voltage (Y-circuit) | 1,500 V DC | 1,500 V DC |
| Double insulation | Yes | Yes |
| Voltage protection level | ≤ 4.5 kV (2 SPDs in series) | ≤ 5.5 kV (2 SPDs in series) |
| Type | PRT-PV-P-1500/20-550 | PRT-PV-P-1500/20-680 |
| Order No. | 1013424 | 1026507 |

Power supplies with maximum functionality

Strongest power supply on the market

QUINT POWER boasts innovative functions. The 1 AC device with an expanded PFC concept ensures a high degree of efficiency over the entire power range. The 3 AC device does not generate any inrush current, thus preventing unintended tripping of the backup fuse.

COMPLETE line

Your advantages

- ✓ Strongest output side: easy system expansion, reliable heavy load startup, and miniature circuit breaker tripping
- ✓ Most robust input side: high noise immunity, thanks to integrated gas-filled surge arrester (up to 6 kV) and ≥ 20 ms mains failure buffer time
- ✓ Most comprehensive signaling: preventive function monitoring reports critical operating states before errors occur
- ✓ Available pre-configured: from a batch quantity of just 1

Main features

- Static and dynamic boost
- Selective Fuse Breaking Technology (SFB): 6 times the nominal current for 15 ms
- Analog, digital, and relay contacts
- Integrated gas-filled surge arrester
- Wide temperature range: $-40^{\circ}\text{C} \dots +70^{\circ}\text{C}$
- Multi-level PFC concept (1 AC) for a long service life
- No inrush current (3 AC)

DC/DC converters with maximum functionality

Free choice of connection technology

The new generation of the QUINT DC/DC converters offers superior system availability with innovative functions. The IECEx approval enables use in potentially explosive areas. Signaling thresholds and characteristic curves can be adapted over the NFC interface.

Push-in Technology
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Strongest output side: easy system expansion, reliable heavy load startup, and miniature circuit breaker tripping
- ✓ Most comprehensive signaling: preventive function monitoring reports critical operating states before errors occur
- ✓ Free selection between Push-in and screw connection
- ✓ Available pre-configured: from a batch quantity of just 1

Main features

- Static boost up to 125% for a sustained period
- Dynamic boost up to 200% for 5 s
- Selective Fuse Breaking Technology (SFB): 6 times the nominal current for 15 ms
- Analog, digital, and relay contacts
- IECEx approval
- Wide temperature range: -25°C ... +70°C, startup type tested: -40°C

Power supplies with maximum functionality

Protection against extreme ambient conditions

QUINT POWER power supply now as Plus version with protective coating and ATEX/IECEX approval for potentially explosive areas (zone 2). The integrated decoupling MOSFET and SIL 3 certification enable superior system availability and maximum operational safety.

COMPLETE line

Your advantages

- ✓ Strongest output side: easy system expansion, reliable heavy load startup, and miniature circuit breaker tripping
- ✓ Most robust input side: high noise immunity, thanks to integrated gas-filled surge arrester (up to 6 kV) and ≥ 20 ms mains failure buffer time
- ✓ Most comprehensive signaling: preventive function monitoring reports critical operating states before errors occur
- ✓ Available pre-configured: from a batch quantity of just 1

Main features

- Static boost up to 125% for a sustained period
- Dynamic boost up to 150% for 5 s
- Selective Fuse Breaking Technology (SFB): 6 times the nominal current for 15 ms
- Analog, digital, and relay contacts
- Integrated gas-filled surge arrester
- Wide temperature range: $-40^{\circ}\text{C} \dots +75^{\circ}\text{C}$
- SIL 3 certification and protective coating
- Integrated decoupling MOSFET

Active redundancy module

OVP even under extreme conditions

The new QUINT S-ORING VP version supplements the active redundancy modules. Supply networks are decoupled and lines are disconnected continuously while they are routed to the load. Surge voltages at the output are limited to 30 V, maximizing operational safety.

COMPLETE line

Your advantages

- ✓ Consistent redundancy up to the consumer
- ✓ Constant monitoring of input voltage and decoupling section
- ✓ Save energy by decoupling with MOSFET
- ✓ Protection against surge voltages in excess of 30 V DC at the output
- ✓ Protective coating with ATEX and IECEx approval for extreme ambient conditions

Main features

- Isolated cable routing
- Preventive function monitoring
- Active decoupling with MOSFET
- Overvoltage Protection (OVP)
- Input/output voltage drop: 0.1 V DC
- Conductor cross sections up to 16 mm²
- Wide temperature range: -40°C ... +70°C

| | |

| Order No. | 1043418 |

Power supplies with maximum functionality

Powerful and space-saving

The power supplies with new voltages in the power range up to 100 W expand the QUINT POWER range. Superior system availability with the smallest size, preventive function monitoring, and exceptional power reserves are now also available in the low-power range.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Startup of heavy loads, thanks to dynamic boost
- ✓ Preventive function monitoring reports critical operating states before errors occur
- ✓ High efficiency and long service life with low power dissipation and low heating
- ✓ Space savings in the control cabinet, thanks to a narrow, slim-line design
- ✓ Fast and easy startup, thanks to tool-free Push-in connection technology

Main features

- Power reserves:
 - Static boost up to 125% for a sustained period
 - Dynamic boost up to 200% for 5 s
- Configurable signaling of DC OK or selectable power thresholds
- Efficiency up to 92.4%
- Further DC input voltage range 88 V DC ... 350 V DC
- Wide temperature range: -40°C ... +70°C

Power supplies with basic functionality

Compact load supply with 480 W

The thin UNO POWER power supply from the second generation offers active function monitoring for the first time ever, with a DC OK LED and relay contact. Its extremely compact design and high degree of efficiency makes it the optimal solution for loads up to 480 W.

Your advantages

- ✓ Save space in the control cabinet, thanks to an extremely slim overall width of 59 mm
- ✓ Save energy, thanks to a high degree of efficiency
- ✓ Outdoor installation possible at a wide temperature range of -25°C ... +70°C
- ✓ Easy monitoring of the output voltage, thanks to floating DC OK relay contact

Main features

- Adjustable output voltage: 24 V DC ... 28 V DC
- LED signaling and DC OK relay contact
- High power density: 500 W/dm³
- Efficiency up to 94.6%
- High MTBF: > 500,000 h
- Wide temperature range: -25°C ... +70°C

i Web code: #2179

| Description | Power supply 1-phase |

| Order No. | 2910105 |

Power supplies with standard functionality

Fast mounting and contacting

The new TRIO POWER power supply for the CrossPowerSystem power distribution board is perfectly adapted for use in machine building. All functions and the space-saving design are tailored to the stringent demands in this area.

Your advantages

- ✓ Push-in connections for easy 24 V DC control voltage connection
- ✓ Rapid startup: tool-free mounting and automatic contacting in one easy step (CrossPowerSystem)
- ✓ Reliable starting of heavy loads with dynamic boost
- ✓ Electrically robust, thanks to high electric strength
- ✓ Maximum flexibility, thanks to temperature range from -25°C ... +70°C and device startup at -40°C

Main features

- 24 V DC as control voltage using Push-in connection
- Electrical contacting by simply snapping on
- Power reserve: dynamic boost up to 150% for 5 s
- LED and relay contact signal DC OK
- Wide temperature range: -25°C ... +70°C, startup type tested: -40°C

| | |
|---|---|
|  Web code: #2178 |  |

| Dimensions W x H x D [in mm] | 36 x 160 x 159 |
| Type | EM-CPS-PS/3AC/24DC/5 |
| Order No. | 1064922 |

Power supplies with standard functionality

Robust with IP67 degree of protection

The new TRIO POWER power supplies with IP67 degree of protection are optimally suited for installation in the field. Thanks to its weather-resistant design, you can also use the device in harsh ambient conditions.

Your advantages

- ✓ Direct installation on the consumer in the field reduces cable lengths and creates space in the control cabinet
- ✓ Robust design (aluminum pressure housing) ensures high system availability, thanks to resistance to extreme ambient conditions (temperature, dust, and water)
- ✓ Reliable starting of heavy loads with dynamic boost
- ✓ High degree of efficiency of > 93%, thanks to low power losses

Main features

- IP67 degree of protection
- Dynamic boost supplies 1.5 times the nominal current for 5 seconds
- High shock and vibration resistance, plus electric strength
- Efficiency up to > 93%
- Wide temperature range: -25°C ... +85°C, startup type tested: -40°C

| Order No. | 1039830 | 1039829 |

DC UPS with integrated energy storage

Maximized buffer time

The STEP UPS is now available with new storage technology and standard round cells. The buffer time increases to over 70%, thanks to the use of lithium-ion technology. For reliable bridging of a mains failure, the STEP UPS is therefore the most compact solution.

Your advantages

- ✓ Stable supply of sensitive consumers, thanks to regulated output voltage
- ✓ Safety provided by integrated protective circuit and temperature monitoring of the energy storage
- ✓ Quick and easy installation, thanks to integrated energy storage
- ✓ Ending battery operation via remote contact
- ✓ Flexible assembly by snapping onto the DIN rail or screwing on a level surface

Main features

- Versions: 24 V DC and 12 V DC
- Efficiency up to 97%
- High power density: 66.7 Wh/dm³
- Three active signal contacts
- R1/R2 remote contact
- Integrated energy storage: lithium-ion technology

|  Web code: #2236 |  |  |

Extremely compact signal conditioners

Easy to handle in confined spaces

The thin, 6.2 mm MINI Analog Pro signal conditioners are extremely easy to install and start up in a confined space. Use the new, configurable 3-way signal conditioners to electrically isolate, convert, amplify, and filter standard signals.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Easy installation, thanks to easily accessible terminal points and pluggable connection terminal blocks
- ✓ Measure current signals during operation without disconnecting the current loop
- ✓ Easy network integration by using compact gateways
- ✓ Versatile parameter configuration via DIP switch, software or app
- ✓ Easy to maintain: large marking areas, status LEDs, and group error messaging

Main features

- Overall width: 6.2 mm
- Accuracy: up to 0.05%
- Safe electrical isolation with 3 kV test voltage
- Supply voltage range: 9.6 V DC ... 30 V DC
- Operating temperature: -40°C ... +70°C
- Screw or Push-in connection

Signal conditioners with functional safety

Safety for machines and systems

In all phases of the product lifecycle, the MACX signal conditioners have been developed and produced in accordance with the IEC EN 61508 standards. New threshold value switches and temperature transducers offer new functions to you.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Use up to SIL 2 and up to SIL 3 (SC 3) in 2-channel architecture, thanks to certification in accordance with IEC EN 61508
- ✓ Interference-free signal transmission, thanks to the patented transmitter concept
- ✓ Configuration of the threshold value switch without software
- ✓ Easy power bridging using the DIN rail connector

Main features

- Can be used up to SIL 2 / SIL 3 in accordance with IEC 61508
- Safe electrical isolation with 2.5 kV test voltage
- Overall width: 12.5 mm
- Screw or Push-in connection

|  Web code: #2168 |  |  |  |

Ex i signal conditioners with functional safety

Maximum explosion protection

The Ex i signal conditioners of the MACX Analog series offer you maximum explosion protection for intrinsically safe circuits up to zone 0 and zone 20. New threshold value switches and temperature transducers round out the extensive product line.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Universal use for intrinsically safe circuits in all Ex zones, thanks to international approval package
- ✓ Use up to SIL 2 and up to SIL 3 (SC 3) in 2-channel architecture, thanks to certification in accordance with IEC EN 61508
- ✓ Interference-free signal transmission, thanks to the patented transmitter concept
- ✓ Configuration of the threshold value switch without software
- ✓ Easy power bridging using the DIN rail connector

Main features

- Intrinsically safe inputs or outputs [Ex ia] IIC / IIIC
- Can be used up to SIL 2 / SIL 3 in accordance with IEC 61508
- Safe electrical isolation with 2.5 kV test voltage
- Overall width: 12.5 mm
- Screw or Push-in connection

|  Web code: #2169 |  |  |  |

Modular hybrid motor starters

Simplicity in functional safety

Switch and reverse motors easily and reliably with CONTACTRON hybrid motor starters. CONTACTRON pro is the new Phoenix Contact product series, offering simple safety integration and modular extension options. Based entirely on hybrid technology.

Push-in Technology[®]
Designed by PHOENIX CONTACT

CONTACTRON Hybrid Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Easy group shutdown via DIN rail connectors after an emergency stop, thanks to an upstream safety relay
- ✓ High system availability, thanks to a service life that is 10 times longer with hybrid technology
- ✓ Easy to handle: with the economical DIN rail connector, you save on wiring effort, which means you save money as well
- ✓ Reliable feedback on the status of the motor via optional relay module

Main features

- Safe group shutdown
- Modular expansion possible
- Additional checkback contacts
- Reduced wiring and cost savings with the DIN rail connector
- Tripping characteristic curve (Class 10 to 3 A)

|  Web code: #2161 |  |  |  |  |

Single-phase solid-state contactors

Thin, durable, and fast

The robust solid-state contactors from Phoenix Contact combine properties such as silent switching, resistance to shocks and vibrations, and easy use in aggressive, contaminated environments.

Your advantages

- ✓ Reliable and fast switching, thanks to wear-free electronics
- ✓ Robust: resistant to shocks and vibrations
- ✓ Easy wiring, thanks to integrated locking circuit and load wiring

Main features

- Suitable for high switching frequencies
- Wear-free switching with no contact bounce
- No high-frequency disturbing pulses when switching
- Versions: 24 V DC and 230 V AC (input)

Halogen-free D-SUB cables

Fast connection in sensitive areas

Connect signal and power cards easily, quickly, and error-free with VARIOFACE system cabling. The new halogen-free D-SUB cables can be used in sensitive areas with high requirements, such as for fire safety.

Your advantages

- ✓ Can be used in sensitive areas, thanks to halogen-free materials
- ✓ Quick, error-free wiring by means of Plug and Play
- ✓ Universal possible applications, thanks to an extensive range

Main features

- Halogen-free in accordance with IEC 60754-1
- Flame-retardant in accordance with IEC 60332-3-22
- Number of positions: 9, 15, 25, 37, and 50
- Lengths: 1, 2, 3 m as well as variable lengths according to specifications
- Universal 1:1 connection, 25 V AC / 60 V DC, max. 2 A

| | | | | | |
|---|---|---|--|---|---|

Front adapters for SIMATIC® ET 200SP HA

Fast and error-free wiring

Using the new front adapters, you can wire interface modules quickly and easily with the SIMATIC® ET 200SP HA peripheral system. To do so, the front adapter relies on the trusted Plug and Play concept for system cabling.

Your advantages

- ✓ Fast startup, thanks to the Plug and Play concept
- ✓ Error-free wiring, thanks to pre-assembled system cables
- ✓ Flexible signal marshalling, thanks to byte-oriented transmission (2 x 8 channels)

Main features

- Easy handling
- Separate power supply
- Can be used by a variety of Siemens I/O modules
- 37-pos. D-SUB pin strip for process connection
- Screw or Push-in connection (connectable termination boards)

| | |
|---|---|

Coupling relay modules

Switching high inrush currents

The PLC-INTERFACE relay system acts as the high-performance interface between the controller and peripheral system equipment. The new coupling relay modules from Phoenix Contact are suitable for switching extremely high inrush currents.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Reliable switching of loads with high inrush currents
- ✓ Space-saving, thanks to narrow, 14 mm design
- ✓ Time-saving potential distribution, thanks to plug-in bridges
- ✓ Efficient connection to VARIOFACE system cabling using an adapter

Main features

- Switching of high capacitive loads (e.g. LEDs)
- Screw or Push-in connection
- Overall width: 14 mm
- Possible to connect the load return line to the basic terminal block directly
- Safe isolation

| i Web code: #0901 | | | | |
|--|---|-------------------------|--------------------------|-------------------------|

Highly compact electronic reversing load relays

Simple connection via Push-in

The PLC-INTERFACE relay system acts as the high-performance interface between the controller and peripheral system equipment. The highly compact electronic reversing load relay for DC motors is now also available with Push-in connection technology.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Reversing the motor without wear
- ✓ Space-saving, thanks to narrow, 6.2 mm design
- ✓ Reliable braking by controlling both inputs
- ✓ Surge-proof and overload-proof output

Main features

- Screw or Push-in connection
- Overall width: 6.2 mm
- Integrated locking circuit and load wiring

| | |
|---|--|
|  Web code: #2165 |  |
| Description | Highly compact electronic reversing load relay |
| Type | PLC-PT-ELR W 1/2-24DC |
| Order No. | 1069556 |

The web code gives you access to additional product versions on our website.

Highly compact relay modules

Resistant to interference voltages

The PLC-INTERFACE relay system acts as the high-performance interface between the controller and peripheral system equipment. The new 14 mm coupling relay modules feature a defined switch-on and switch-off hysteresis against very high interference signals.

Push-in Technology 
Designed by PHOENIX CONTACT

COMPLETE line 

Your advantages

- ✓ Resistant to interference voltages up to 190 V AC, thanks to defined switch-on and switch-off thresholds
- ✓ Space-saving, thanks to narrow, 14 mm design
- ✓ Time-saving potential distribution, thanks to plug-in bridges

Main features

- Use: applications with long control lines and interference sources
- Screw or Push-in connection
- Overall width: 14 mm

Ultra-narrow multifunctional time relays

Space-saving, versatile, and precise

The ultra-narrow multi-functional PLC-TR time relays are the space-saving, cost-efficient solution for simple time control applications, with four adjustable time ranges and function options. Despite the slim design of 6.2 mm, two LEDs enable fast status detection.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Space-saving, thanks to narrow 6.2 mm overall width
- ✓ Convenient, open setting of the desired time range and function using DIP switches on the side panel
- ✓ Precise and convenient time adjustment using the illuminated thumbwheel
- ✓ Clear diagnostics with status LEDs that are easy to see
- ✓ Fast installation, thanks to the use of plug-in bridges and system cabling

Main features

- Supply voltage: 24 V DC
- One adjustable time
- Time range: 0.1 s ... 300 min
- 4 time end ranges
- Non-floating control input
- 4 functions can be selected
- 1 floating changeover contact
- Screw or Push-in connection

Multi-functional energy measuring devices

The fastest way to an energy measurement

Set up the communication interface, select the power network type, configure the measuring input: the EMpro energy measuring devices are ready to use and integrated into the network within minutes. Reduce your wiring and configuration effort and benefit from smart web server functions.

EtherNet/IP

COMPLETE line

Your advantages

- ✓ Only three steps needed for energy measurement, thanks to an intuitive installation wizard
- ✓ The direct connection of manufacturer-independent Rogowski coils reduces wiring and configuration effort
- ✓ Easy to maintain, thanks to smart web server and display functions
- ✓ Deactivation of operating elements and interfaces ensures data security

Main features

- Power supply up to 700 V AC
- Current measurement up to 20,000 A using current transformer
- Direct connection of Rogowski coils
- Data logging for up to 8 parameters, over 90 days at 15 minutes
- Multi-language display

Energy meters with MID certification

Record, communicate, and calculate data

EMpro energy meters make it possible to calculate energy data for the exact cost center. The measuring devices record the most important electrical parameters and make the data available to higher-level control systems using common communication interfaces.

COMPLETE line

Your advantages

- ✓ Simple bus and network connection via the M-Bus, Modbus/RTU or Modbus/TCP interface
- ✓ Narrow on the DIN rail, thanks to overall width of just 72 mm
- ✓ Save time and money: versions with direct current measurement up to 80 A
- ✓ Simple Modbus integration, thanks to uniform index tables with existing EMpro energy measuring devices
- ✓ Remote data access, storage, and export with Ethernet-based devices

Main features

- MID approval in accordance with EN 50470
- Measures current, voltage, power, and energy
- Measurement: direct, up to 80 A without current transformer, or via current transformer
- S0 output
- Ring memory up to a max. of 500 days, with Ethernet-based devices

Current transformers with hybrid connection technology

Fast, reliable, tool-free connection

Wire the new PACT current transformer conventionally using a screw connection or now also without tools with Push-in Technology. Use the easily accessible Push-in clamping parts oriented to the front to connect the conductors quickly and reliably.

Push-in Technology[®]
Designed by PHOENIX CONTACT

Your advantages

- ✓ You have the choice between a screw connection or Push-in connection
- ✓ Quick, reliable, and tool-free wiring, thanks to easily accessible Push-in connection points oriented to the front
- ✓ Extra safety: safe isolation in accordance with EN 50178 up to 1,000 V
- ✓ Detect peak loads reliably with a thermal nominal continuous current that is 120% of the primary rated current

Main features

- Complete range for converting currents up to 3,000 A
- Secondary currents: 1 A/5 A
- Safe isolation in accordance with EN 50178
- Accuracy classes: C05 = 0.5 / C10 = 1
- Variable fastening options
- Overall widths: 30 mm/31 mm

| i Web code: #2172 | | | | |

Modular rotor blade monitoring

Making system data available

Phoenix Contact offers modular rotor blade monitoring with lightning current measurement, ice detection, and load monitoring. Our solution is available in different variants and can also be reliably integrated into existing systems at a later time.

PLCnext Technology 
Designed by PHOENIX CONTACT

Your advantages

- ✓ Maximum availability of wind turbine generators, even under extreme conditions
- ✓ Thanks to remote access, maintenance work can be scheduled and the parameterization can be adjusted
- ✓ Easy integration into existing systems, thanks to open interfaces
- ✓ Early detection of damage and optimized maintenance intervals, thanks to continuous monitoring

Main features

- Modular system based on a PLCnext Technology controller
- Exterior temperature measurement and ice detection on the rotor blade
- Measurement of lightning strikes
- Measurement and evaluation of loads
- Integration of Matlab Simulink models

| | |
|---|--|
|  Web code: #2200 |  |
| Description | Blade Intelligence |
| Type | WIL-BLADE-INTELLIGENCE |

Safe IP67 I/O box with IO-Link

Acquire and output safe signals in the field

The Axioline E Safe IP67 I/O box is new to the modular block Axioline E system. It allows you to process safe inputs and outputs outside of the control cabinet. The safety protocol is transmitted to the standard network via IO-Link.

SafetyBridge Technology[®]
Designed by PHOENIX CONTACT

Your advantages

- ✓ Fast connection of sensors and actuators, thanks to the SPEEDCON fast locking system
- ✓ Adjust safety address without switches
- ✓ Simple integration of safety-related data via an IO-Link master into the standard network
- ✓ Can be used in SafetyBridge Technology and PROFI-safe applications

Main features

- IP67 degree of protection
- 8 safe inputs
- 4 safe outputs, positive and negative switching
- SIL 3 in accordance with IEC 61508/EN 61508
- SILCL 3 in accordance with EN 62061
- UL and cUL
- PL e in accordance with EN ISO 13849-1
- SPEEDCON fast locking system

| | |
|---|--|
|  Web code: #2209 |  |

| Type | AXL E IOL SDI8 SDO4 2A M12 6P |
| Order No. | 2702833 |

Safety relays with IO-Link interface

Smart diagnostics for safety switches

Combined with PSRswitch safety switches, the PSRmini safety relay forms a secure safety door monitoring system. In addition to the traditional task of a safety relay, the PSR-MC42 also provides non-safety-related diagnostic data via IO-Link.

Relay Technology 
Designed by PHOENIX CONTACT

COMPLETE line 

Your advantages

- ✓ Space savings, thanks to the highly compact design
- ✓ Increased data availability for preventive maintenance
- ✓ Reduced wiring effort
- ✓ Easy integration in common fieldbus and automation systems
- ✓ Maximum safety and availability, thanks to force-guided contacts

Main features

- Integrated IO-Link interface
- Two independent sensor circuits
- Overall width: 17.5 mm
- Up to PL e in accordance with ISO 13849
- Evaluation of up to 30 PSRswitch safety switches
- Enabling principle for non-safety-related control of drives
- Morse function as alternative to IO-Link

|  Web code: #2212 |  |  |
|---|---|---|
| Description | Safety relay with IO-Link | |
| Enable paths | 2 | 2 |
| Connection technology | Screw | Spring-cage |
| Type | PSR-MC42 | PSR-MC42 |
| Order No. | 2702901 | 2702902 |

Safe time relays

Flexible DIP switch configuration

The PSRmini PSR-MC73 is a compact, safe time relay, which enables a delayed activation or deactivation. Delay time and operating mode can be set easily using a DIP switch. The time relay is suitable for use in stop categories 0 and 1 in accordance with EN 60204-1.

Relay Technology 
Designed by PHOENIX CONTACT

COMPLETE line 

Your advantages

- ✓ Space savings, thanks to the highly compact design
- ✓ Compatibility with a wide variety of signal generators
- ✓ Configurable functions such as retriggering, pick-up and off-delay using a DIP switch
- ✓ Maximum safety and availability, thanks to force-guided contacts
- ✓ Approvals for all global markets

Main features

- 5 enable paths
- Overall width: 22.5 mm
- Configuration via DIP switches
- For loads up to 6 A
- Up to PL e in accordance with ISO 13849
- Up to SILCL 3 in accordance with IEC 62061
- UL and cUL
- Can be retriggered
- Time range up to 300 s

|  Web code: #2210 |  |  |

| Type | PSR-MC73 | PSR-MC73 |
| Order No. | 1015533 | 1015526 |

Safety relays for hybrid motor starters

Safe and low-wear switching

The PSRmini PSR-MC38 safety relay ensures safety-related shutdown of a motor using the new CONTACTRON pro hybrid motor starter. You can connect the switching devices via the DIN rail connector quickly, easily, and in a modular fashion.

CONTACTRON Hybrid Technology

Designed by PHOENIX CONTACT

COMPLETE line 

Your advantages

- ☒ Compatibility with all signal generators, including PSRswitch safety switches
- ☒ Reduced wiring and cost savings with the DIN rail connector
- ☒ Safety-related group shutdown of motors via DIN rail connectors with upstream safety relay
- ☒ Approvals for all global markets
- ☒ Maximum safety and availability, thanks to force-guided contacts

Main features

- 2 enable paths
- Overall width: 22.5 mm
- Up to PL e in accordance with ISO 13849
- UL and cUL
- Feedback on the status of the motor via optional relay module

|  Web code: #2213 |  |  |  |  |  |

Zero-speed and over-speed safety relays

Live monitoring via software

The PSR-MM30 zero-speed and over-speed safety relay records the speed of moving machine parts and disconnects safely in the event of danger. The PSRmotion software allows you to configure the device conveniently and visualize motion sequences of your machine in live measuring operation.

Relay Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Space savings, thanks to the highly compact design
- ✓ Convenient configuration software with online monitoring
- ✓ Evaluation of safety switches in safety door applications
- ✓ Compatible with modern safety encoders up to SIL 3
- ✓ High system availability, thanks to a reliable measuring process

Main features

- Up to SIL 3 and PL e
- Motion detection via encoder or proximity switch
- Startup via USB connection
- Force-guided relay outputs
- Monitoring of downtime and up to 3 different operating modes
- Free PSRmotion software
- Compatibility with PSRswitch switches

| | | |
|---|---|---|
|  Web code: #2211 |  |  |

Ethernet extenders

Virtually separating IP networks

Thanks to the Ethernet extenders, you can easily connect Ethernet applications covering up to 20 kilometers via a two-wire cable by means of Plug and Play. The new firmware lets you use VLAN to virtually separate critical, sensitive IP networks and now make them even more secure.

COMPLETE line

Your advantages

- ✓ Startup and service replacement via Plug and Play
- ✓ Save costs, thanks to the use of unmanaged extenders in complex IP networks
- ✓ Simple VLAN configuration using software wizards without expert knowledge
- ✓ Greater flexibility, thanks to continuous remote diagnostics of all extender devices and paths via IP

Main features

- Using VLAN to virtually separate IP networks and make them more secure
- Automatic alarm generation via Simple Network Management Protocol (SNMP)
- Facilitate connection and diagnostics of widespread IP networks
- Ethernet communication up to 20 km over any two-wire cable

Serial device servers and gateways

Integrating Modbus devices into EtherNet/IP™

Four more variants have been added to the serial device servers and gateway product range, which now includes 24 products. The new Modbus to EtherNet/IP™ protocol converter enables integration of Modbus slaves into the EtherNet/IP™ protocol.

EtherNet/IP™ 

COMPLETE line

Your advantages

- ✓ Integration of Modbus devices into EtherNet/IP™ networks
- ✓ Secure network communication, thanks to 256 bit AES encryption
- ✓ Easy configuration via web-based management
- ✓ Powerful diagnostic options for the ports
- ✓ Each port can be used universally – either as RS-232, RS-485 or RS-422

Main features

- Up to 4 serial ports per device
- Up to 2 Ethernet ports per device
- Extended temperature range:
40°C ... +70°C

|  Web code: #2241 |  |  |  |  |

NAT switches

Segmenting networks flexibly

You can use NAT switches to integrate systems with the same IP address ranges into higher-level networks. The new 2000 NAT switches have flexible uses, as their ports can be distributed individually in WAN or LAN ports and various NAT mechanisms can be used.

COMPLETE line

Your advantages

- ✓ Flexible use, thanks to 8 WAN/LAN ports that can be freely distributed as needed
- ✓ Improved reliability, thanks to redundancy mechanisms on the WAN and LAN sides
- ✓ LAN-side PROFINET device function enables PROFINET configuration and diagnostics mechanisms
- ✓ The right NAT mechanism is always available, thanks to support from 1:1 NAT, virtual NAT, and IP masquerading, including port forwarding

Main features

- RSTP redundancy in the WAN and LAN
- MRP redundancy in LAN
- Layer 3 or NAT switch application
- Approvals for maritime applications and the process industry
- IGMP snooping/querier
- HTTPS/SNMPv3
- DHCP server, port-based/pool-based, option 82 (2008 version, only port-based)

|  Web code: #2203 |  |  |  |

Industrial WLAN access point

Powerful and flexible

FL WLAN 5110 is a powerful WLAN access point and client for assembly in the control cabinet. Two external antenna connections enable flexible use of the respective compatible antenna, ensuring a strong and reliable WLAN signal.

EtherNet/IP

Your advantages

- ✓ Easy and central configuration of your access points using cluster management technology
- ✓ Stable, fast, and reliable remote communication, thanks to MIMO technology
- ✓ Extremely secure, thanks to the support of current WLAN security mechanisms
- ✓ Compact design for use in the control cabinet or in the control box in the field

Main features

- WLAN access point, client, and repeater
- IEEE 802.11 a/b/g/n
- Frequency band: 2.4 GHz and 5 GHz
- 2 external antenna connections with MIMO technology (2 x 2)
- Maximum data rate: 300 Mbps
- Maximum transmission power: 20 dBm

|  Web code: #2204 |  | |
|---|---|--------------|
| Description | WLAN access point and client | |
| Approval | Europe | USA, Canada |
| Type | FL WLAN 5110 | FL WLAN 5111 |
| Order No. | 1043193 | 1043201 |

Network management software

Managing and visualizing networks

The FL Network Manager helps you to easily start up, configure, and monitor Phoenix Contact Managed Switches, WLAN components, and security appliances. In the latest version, a topological depiction provides an overview in the network.

Your advantages

- ✓ Networks are always visible, thanks to a topological depiction
- ✓ Update firmware on multiple devices quickly and easily
- ✓ Multi-device configuration for fast configuration of many devices simultaneously
- ✓ IP address planning for the convenient rollout of IP addresses
- ✓ Intuitive user interface

Main features

- Monitoring of network component availability
- Integrated TFTP, DHCP/BOOTP server
- IP address assignment via DCP, BOOTP, DHCP
- Simple firmware update
- Convenient saving and loading of configuration files

| | |
|---|--|
|  Web code: #2205 |  |
| Description | Network management software |
| Type | FL NETWORK MANAGER |
| Order No. | 2702889 |

mGuard mobile routers

High-speed communication in the US

Security routers protect your industrial networks against IT attacks. The new security router enables high-speed data connection over mobile 4G networks (LTE) in the US. This makes it ideal for infrastructure applications and remote machine maintenance.

Your advantages

- ✓ High performance, thanks to 4G data links (LTE)
- ✓ Easy configuration via central management tool
- ✓ Compatible with mGuard Secure Cloud
- ✓ Easy integration, thanks to integrated Ethernet Switch
- ✓ Quick and easy startup, updates, and device replacement via SD card

Main features

- 4G connections (LTE) up to 150 Mbps
- Stateful inspection firewall
- Slot for SD memory card
- Metal housing
- Temperature range: -40°C ... +60°C
- Function extensions for deep packet inspection are optionally available

|  Web code: #2206 |  | |  | |

TC Mobile I/O signaling system

Alerting and switching over 4G (LTE)

Using TC Mobile I/O X200..., you can monitor sensor signals over the mobile phone network using SMS and e-mail and remotely switch relays using SMS and the app. The 4G technology with 2G fallback is future-proof and also enables use of effectively expanded 2G networks.

Your advantages

- ✓ Future-proof, thanks to 4G mobile phone technology (LTE)
- ✓ Fewer downtimes, thanks to automatic alerts via SMS and e-mail
- ✓ Lower costs, thanks to event-driven alerts
- ✓ SMS alert in the event of power failure
- ✓ AC and DC versions available with extended voltage range

COMPLETE line

Main features

- EU version: 4G (LTE Cat.1, B3, B7, B20) with 2G fallback (GSM, GPRS, EDGE)
- DIN rail or wall mounting
- Compact design: 4TE (DIN 43880)
- Temperature range: -25°C ... +70°C
- Reporting trail for guaranteed information transfer
- Remote commands for device configuration
- Configuration via web browser

|  Web code: #2207 |  |  |

Wireless solution for data and signals

Modular solution for outdoor use

The Radioline outdoor box can be installed outdoors in order to remotely transfer I/O signals or serial data quickly and easily. You select the wireless modules, and the type and number of I/O expansion modules during ordering.

Your advantages

- ✓ Completely pre-wired control box with integrated power supply unit, surge protection, selected wireless module, and I/O expansion modules
- ✓ Fast and easy connection of the power supply and I/O signals
- ✓ Can be used outdoors, thanks to a robust, UV-resistant, and impact-proof IP66 housing
- ✓ Flexible in physical terms, thanks to ranges covering several kilometers

Main features

- Wireless module (selectable): 868 MHz, 900 MHz or 2,400 MHz
- Can be extended with up to three selectable I/O expansion modules
- Including M20 cable glands, antenna feed-through, and a pressure compensation element
- Ambient temperature range: -25°C ... +55°C
- Universal power supply unit: 100 V AC ... 240 V AC

| | |
|--|--|
|  Web code: #2208 |  |

| Type | RAD-RUGGED-BOX-CONF |
| Order No. | 1091638 |

Wireless solution for data and signals

900 MHz outdoor box for I/O signals

The Radioline product range is being extended by a 900 MHz outdoor box featuring an integrated I/O module with digital and analog inputs and outputs. The NEMA 4X housing is perfect for direct installations outdoors.

Your advantages

- ✓ Splash-proof NEMA 4X housing saves time and work during installation
- ✓ Universal AC or DC power supply
- ✓ Intuitive startup and configuration
- ✓ Connection to standard 900 MHz Radioline wireless modules possible
- ✓ Also suitable as a simple outdoor repeater

Main features

- Wireless module: 900 MHz
- 6 integrated I/O channels
- Can be used in North America
- Range of up to 32 km
- Ambient temperature range: -40°C ... +65°C
- Power supply: 10.8 V DC ... 30.5 V DC or 100 V AC ... 240 V AC

LED signal lights

Functional safety in signal systems

The LED signal lights for maritime use can be used for the reliable and energy-efficient operation of light-signal systems. Thanks to the adapted light properties and safety function, the lights are ideal for use in inland navigation, e.g. in locks.

SafetyBridge Technology[®]
Designed by PHOENIX CONTACT

Your advantages

- ✓ Safety function in accordance with the IEC 61508 safety standard (type 200S signal light)
- ✓ Easy and fast integration into your network, thanks to standard interfaces
- ✓ Robust aluminum housing in IP65 for harsh outdoor use
- ✓ Cost reduction, thanks to long-lasting and efficient LED technology
- ✓ High system availability, thanks to the use of autonomous monitoring functions

Main features

- Safe diagnostics up to SIL 2 / PL d (type 200S)
- LED service life: at least 50,000 h
- Light intensity up to 7300 Cd
- Can be dimmed in 256 steps
- Fieldbus communication up to 400 m
- Connection: M12 SPEEDCON hybrid plug
- Various light colors available in accordance with IALA recommendation E200-1

PLCnext Store

Open software store for automation

The PLCnext Store provides software apps that enable you to expand the functions of a PLCnext Control range controller directly and easily. As developers of software solutions, you can also create your own apps and offer them on the platform.

PLCnext Technology 
Designed by PHOENIX CONTACT

Your advantages

- ✓ Accelerated application development, thanks to easy access to software apps for the PLCnext Control range
- ✓ Innovative solution approaches as well as expanded versatility and possible applications for your automation solution, thanks to the dynamically growing range of apps
- ✓ Creative ideas and new solutions for your application, including special software – even for niche markets

Main features

- Digital sales platform for application software for functional expansion of the PLCnext Control range
- In addition to Phoenix Contact software, apps are also offered by third-party providers
- Diverse portfolio of different apps for all applications – from software libraries to programmed apps

| | |
|-------------|--|
| |  |
| Description | PLCnext Store |
| Address | http://www.plcnextstore.com |

Safety controller for PLCnext Technology

Safe high-performance controller

The first high-performance controller for PLCnext Technology. It is possible to use applications with the highest safety requirements in accordance with SIL 3 or PLe, respectively. Standard and safety programming in only one engineering tool, thanks to PLCnext Engineer.

PLCnext Technology 
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Highest level of safety of machinery, thanks to diversified CPUs and the support of up to 300 PROFIsafe devices
- ✓ Preferred programming languages and environments, open-source software, apps, Proficloud, and soon also PLCnext Store with real-time execution
- ✓ One of the highest-performing products on the market, thanks to use of an Intel i5 Dual Core processor and two powerful processors on ARM architecture

Main features

- PROFINET controller and device
- PROFIsafe profile V2.6.1 support
- Safety CPU:
 - 1 x ARM® Cortex®-A9, 800 MHz,
 - 1 x ARM® Cortex®-A8, 600 MHz
- Standard CPU:
 - Intel® Core™ i5-6300U
 - (Dual Core, 2.4 GHz)
- System networking M2M with OPC UA

| | |
|---|--|
|  Web code: #2215 |  |
| Description | High-performance PLC for PLCnext Technology |
| Ambient temperature (operation) | 0°C ... +55°C (above +40°C only with fan module) |
| Type | RFC 4072S |
| Order No. | 1051328 |

PLC expansion for PLCnext Control

Additional Ethernet interface

The module provides an extra Ethernet interface with an additional MAC address for PLCnext Control of the Axiocontrol series. For this purpose, the left side of the module is connected to a compatible PLC. Configuration takes place using PLCnext Engineer.

COMPLETE line

Your advantages

- ✓ Individual expansion option for controllers from the PLCnext Control range of the Axiocontrol series
- ✓ Additional gigabit-enabled Ethernet interface
- ✓ Additional independent MAC address
- ✓ PROFINET support

Main features

- Connection via RJ45 socket
- Left-side connection to the PLCnext Control of the Axiocontrol series
- Extended temperature range: -25°C ... +60°C
- Use in harsh conditions in accordance with Axiocontrol standard possible

| | |
|---|--|
|  Web code: #2216 |  |
| Description | Left-alignable Ethernet interface |
| Transmission speed | 10/100/1,000 Mbps (with auto-negotiation) |
| Connection method | 1 x RJ45 socket |
| Dimensions without bus socket W x H x D [mm] | 35 x 126.2 x 52.6 |
| Ambient temperature (operation) | -25°C ... +60°C |
| Type | AXC F XT ETH 1TX |
| Order No. | 2403115 |

I/O adapter terminal for PLCnext Control

Interface for flexible automation solutions

The adapter terminal provides an interface for the finely granular Inline I/O system. It can be used for the PLCnext Control of the Axiococontrol series. For this purpose, the right side of the terminal is connected to a compatible PLC.

Your advantages

- ✓ Inline I/O adapter terminal specifically developed for the PLCnext Control of the Axiococontrol range
- ✓ Options for flexible automation solutions, thanks to a variety of functional I/Os
- ✓ Convert existing machines and systems to the new, open PLCnext Technology ecosystem

Main features

- Right-alignable Inline adapter terminal for AXC F 2152
- Up to 63 Inline local bus devices alignable
- Automatic transmission speed recognition
- Diagnostics and status indication

| | |
|---|--|
|  Web code: #2217 |  |
| Description | Adapter terminal for Inline I/Os |
| Type | AXC F IL ADAPT |
| Order No. | 1020304 |

Plant control and monitoring

Smart automation of plants

You can use the standardized and modularly expandable control cabinet solution to automate your machines and plants extremely efficiently. The individual versions enable you to perform various functions, from monitoring alone to complex control of your plant.

PLCnext Technology 

Designed by PHOENIX CONTACT

Your advantages

- ✓ Various possible applications in production, thanks to a modularly expandable control cabinet concept
- ✓ Fast commissioning, thanks to standardized solutions with extensive software packages
- ✓ Efficient plant operation, thanks to possible use of smart services as part of predictive maintenance and big data analyses
- ✓ PLCnext Technology enables use of traditional and modern programming languages

Main features

- Dimensions 500 x 500 x 210 mm (W x H x D)
- Protection class: IP54
- Input voltage: 400 V AC ... 500 V AC
- SafetyBridge safety modules with 8/16 inputs and 4/8 outputs in two-channel/ single-channel assignment for 24 V/400 V load circuits
- Axioline I/O module with 8 digital inputs and outputs
- 7" web panel with eHMi visualization

 Web code: #2201

| Description | Smart Production Cabinet |
|-------------------------------|--|
| Functions | Controller, diagnostics, and monitoring with functional safety up to SIL 3, PL d |
| Expandable function blocks | Cloud and WLAN connection, network security etc. |
| Configurable safety functions | EMERGENCY STOP, safety door, two-hand start |
| Communication protocols | PROFINET (suitable for control of up to 64 PROFINET devices), OPC UA |
| Type | Smart Production Cabinet |
| Order No. | 1051048 |

Axioline F IO-Link master

IP20 master for connection of IO-Link devices

IO-Link master for connection of up to eight IO-Link devices in the control cabinet and use in the Axioline F I/O system. Parameterization of IO-Link devices is performed using IOL-CONF software.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Convenient parameterization of connected IO-Link devices using IOL-CONF software
- ✓ Fast installation, thanks to Push-in connection technology
- ✓ Simple increase in the IO-Link ports within an Axioline F I/O station, thanks to the addition of other IO-Link masters

Main features

- Connection of 8 IO-Link devices
- Connection of IO-Link devices in 3-conductor technology
- Parameter data storage on the master
- IO-Link specification v1.1.2
- IP20 degree of protection

| | |
|---|--|
|  Web code: #2218 |  |
| Description | IO-Link master |
| I/O functionality | IO-Link ports, type A |
| Connection method | Push-in |
| Type | AXL F IOL8 2H |
| Order No. | 1027843 |

Stand-alone IO-Link master

IP20 master for connection of IO-Link devices

IO-Link master for connection of IO-Link devices in the control cabinet and use in the network protocols EtherNet/IP™, PROFINET, and Modbus/TCP. The IO-Link devices are parameterized using an integrated web server.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Convenient web server for parameter configuration and diagnostics of IO-Link devices
- ✓ Fast installation, thanks to Push-in connection technology
- ✓ Future-proof communication, thanks to PROFINET, EtherNet/IP™, and Modbus/TCP

Main features

- 8 IO-Link ports
- 8 digital inputs
- Push-in connection technology
- IO-Link V1.1 compatibility
- IP20 degree of protection
- Operating temperature range: -25°C ... +60°C

| | | |
|---|---|---|
|  Web code: #2219 |  |  |
| Description | IO-Link master for PROFINET | IO-Link master for EtherNet/IP™ |
| I/O functionality | IO-Link port, type A | IO-Link port, type A |
| Connection method | Push-in | Push-in |
| Type | IOL MA8 PN DI8 | IOL MA8 EIP DI8 |
| Order No. | 1072838 | 1072839 |

Axioline E components

IO-Link device with 4 analog TC inputs

The Axioline E IO-Link/analog converter is an IO-Link device that transmits analog signals of type K thermocouples (TC) via the IO-Link protocol.

Your advantages

- ✓ Fast connection of thermocouples, thanks to Push-in connection technology
- ✓ Easy connection of four conventional thermocouples in the field
- ✓ Space-saving installation, thanks to compact design

Main features

- Connection to an IO-Link master with M12 connector (A-coded, 4-pos.)
- IO-Link specification v1.1.2
- 4 differential inputs for thermocouples
- Measuring range: -270°C ... +1372°C
- IP65 degree of protection

|  Web code: #2222 |  |
|---|--|
| Description | Analog converter |
| I/O functionality | 4 TC inputs (type K) |
| Connection method | Push-in (for analog TC inputs) |
| Type | AXL E IOL TC4 K M12 |
| Order No. | 2702983 |

Axioline E IO-Link box

Digital input in the field

Axioline E is the block-modular I/O system for field installation. The portfolio has been expanded by adding a 16-channel input device for acquiring digital signals.

Your advantages

- ✓ Fast connection of sensors and actuators, thanks to the SPEEDCON fast locking system
- ✓ Downtimes minimized, thanks to a high level of mechanical robustness
- ✓ Expanded possible applications with a large temperature range of -25°C to +60°C

Main features

- IO-Link specification v1.1.2
- Connection of up to 16 channels
- Diagnostics and status indicators
- Short-circuit and overload protection of the sensor supply
- Device rating plate stored
- Degree of protection IP65, IP67

| | |
|---|--|
|  Web code: #2220 |  |
| Description | I/O device for digital input |
| I/O functionality | 16 digital inputs |
| Connection method | M12 connectors, A-coded |
| IO-Link port | Type A |
| Type | AXL E IOL DI16 M12 6P |
| Order No. | 2702660 |

Inline I/O components

Bus coupler for PROFINET

Inline is the flexible I/O system for the control cabinet. A new PROFINET bus coupler with a compact design has been added to the product range.

Your advantages

- ✓ Compact station structure, thanks to 40 mm housing width, saves space in the control cabinet
- ✓ Continuous expandability of the fieldbus system, thanks to a remote bus branch (three other levels)
- ✓ Use of all PROFINET functions, thanks to the current specification

Main features

- Up to 63 devices can be connected
- 2 RJ45 connections
- Electrical isolation between Ethernet interface and logic
- Diagnostics and status indicators

| | |
|---|--|
|  Web code: #2221 |  |
| Description | Bus coupler for PROFINET |
| Connection method | Spring-cage connection |
| Ambient temperature (operation) | -25°C ... +55°C |
| Type | IL PN BK-PAC |
| Order No. | 2403696 |

Axioline F components

I/O module for pulse width modulation

Axioline F is the fast, robust, and easy I/O system. An I/O module for pulse width modulation has now been added to the product range. Two channels that operate independently of one another offer the option of pulse width modulation (PWM) for the output signals.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Reduced storage, thanks to the use of operating modes PWM and pulse generator in a module
- ✓ Flexible connection of the peripheral equipment, thanks to the choice of a 5 V or 24 V output for each channel for individual use
- ✓ Selectable frequency resolution for optimal adaptation to the application
- ✓ Fast installation, thanks to Push-in connection technology

Main features

- Supports the operating modes PWM and pulse generator
- Push-pull output
- Output of 5 V or 24 V signals
- Nominal current per output: 500 mA for a 24 V output

| | |
|---|--|
|  Web code: #2223 |  |
| Description | I/O module for pulse width modulation |
| I/O functionality | Pulse width modulation, frequency generator or pulse/direction signal output |
| Type | AXL F PWM2 1H |
| Order No. | 1007352 |

Axioline F components

I/O modules for extreme conditions

Further I/O modules with an extended temperature range and coated printed-circuit boards are now also available for the fast, particularly robust Axioline F I/O system with high signal density. This means that Axioline F is opening up an even broader field of application for you.

Push-in Technology[®]
Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ Far-reaching range of applications, thanks to comprehensive temperature range
- ✓ The coated printed-circuit boards withstand even the toughest ambient conditions
- ✓ High noise immunity, even in environments subjected to strong electromagnetic influences
- ✓ Fast installation, thanks to Push-in connection technology

Main features

- Extended temperature range:
-40°C ... +70°C
- Permissible humidity (operation):
5% ... 95%
- Noise emission:
Class B in accordance with EN 61000-6-3
- Noise immunity:
8 kV air discharge in accordance with EN 61000-4
- Maximum altitude: 3,000 m above sea level without derating

| | | | |
|---|---|--|---|
|  Web code: #2224 |  |  |  |
| Description | I/O module for extreme conditions | | |
| I/O functionality | 8 digital outputs | 2 analog inputs, 2 analog outputs | 4 RTD temperature inputs |
| Type | AXL F DO8/2 2A XC 1H | AXL F AI2 AO2 XC 1H | AXL F RTD4 XC 1H |
| Order No. | 1035427 | 1035429 | 1035430 |

Modular proxy Axioline P

Connecting PROFIBUS PA with PROFINET

Modular proxy for direct connection of up to eight PROFIBUS PA segments to PROFINET networks. The modularly designed station communicates with a PROFINET controller over a bus coupler.

Push-in Technology[®]

Designed by PHOENIX CONTACT

COMPLETE line

Your advantages

- ✓ PROFINET redundancies (S2, R1, and R2) and redundant power supply for each PROFIBUS PA segment increase the system availability
- ✓ Direct connection of PROFIBUS PA devices to PROFINET saves time and additional interfaces
- ✓ Efficient modernization of systems and the combination of proven fieldbus technology with today's and tomorrow's digitalization

Main features

- Supports S2, R1, and R2 PROFINET redundancies
- Connection of up to 256 PROFIBUS PA devices
- Free GSDML composer
- Push-in connection technology
- Degree of protection: IP20
- ATEX and IECEx approval
- Ambient temperature (operation): -40°C ... +65°C

|  Web code: #2225 |  |  |  |
|---|---|--|---|
| Description | Bus coupler | Fieldbus power supply socket | Fieldbus power supply |
| Type | AXL P BK PN AF | AXL P FBPS BASE | AXL P FBPS 28DC/0.5A |
| Order No. | 2316390 | 2316393 | 2316394 |

Powerful web panels

Chromium browser for HTML5 applications

The new HMI device series WP 4000 with HTML5-compatible browser features powerful web panels for sophisticated applications. The devices perform operating and monitoring tasks with high visualization requirements.

COMPLETE line

Your advantages

- ✓ Flexible, thanks to open web standard and free choice of web server and visualization software
- ✓ No security updates are required for JAVA or Flash plug-ins
- ✓ Ideal for use with PLCnext Engineer or CODESYS
- ✓ Visualization of self-programmed JavaScript applications possible
- ✓ Secure communication, thanks to SSL-encrypted data transmission

Main features

- 7" displays with resistive touch, 7", 10.1", and 12.1" displays with capacitive multitouch
- ARM® Cortex®-A53 processor
- Mass storage: 8 GB Flash
- Interfaces: 2 x USB 2.0, 1 x Ethernet (10/100 Mbps)
- Aluminum front and metal housing
- Linux Yocto with Chromium web browser

|  Web code: #2226 |  | |  | |
|---|---|--------------|---|---------------|

| Touch technology | Analog resistive, polyester | | Projective-capacitive, PCAP | |
| Type | | | WP 4000 | |
| Order No. | | | 1065546 (configurable product) | |

Web panels for basic applications

Open browser for HTML5 standard

The new HMI device series BWP 2000 with HTML5-compatible browser features affordable web panels for basic applications. The basic web panels are added to the existing product portfolio as an affordable entry-level version and fulfill basic visualization requirements.

Your advantages

- ✓ HTML5-compatible browser integrated in all devices
- ✓ Easy startup: just enter the IP and URL
- ✓ No security updates are required for JAVA or Flash plug-ins
- ✓ Energy efficient due to LED backlighting
- ✓ Best price/performance ratio

Main features

- 4.3", 7", and 10.1" displays with analog resistive touch
- ARM® Cortex®-A9 processor
- Mass storage: 4 GB Flash
- Interfaces: 1 x USB 2.0, 1 x Ethernet (10/100 Mbps)
- Plastic housing
- Linux Yocto with Otter web browser

Mobile panel with connection box

The modern solution for intuitive teach-in

The HTP10 1000 mobile panel with ergonomic housing, brilliant display, integrated safety elements, performance on the PC level, and Windows 10 IoT® is the latest solution for intuitive teach-in (starting/setting up the machine) and commissioning, as well as diagnostics and maintenance.

Your advantages

- ✓ Ergonomic design
- ✓ Suitable for drops from up to 1 m high
- ✓ Integrated safety functions
- ✓ Simple and intuitive operation
- ✓ Windows 10 LTSB 2016 for the simple use of common visualization tools or C#, C++ for creating the application

Main features

- Large 10.1" display (1280 x 800 WXGA)
- Precise touch operation (analog resistive)
- Powerful Intel® Atom™ E3815 processor
- Windows 10 LTSB 2016
- Portico 3 client for remote operation
- 2 enable switches, 3-stage
- Illuminated EMERGENCY STOP button

Robust IP66 panel PCs

Operating terminals for vehicle use

The VMT 9000 series specially developed for the logistics and agricultural and construction machinery target markets features a high-quality, highly compact, and extremely robust design, ensuring that it functions properly even in the harshest environments.

Your advantages

- ✓ Display that is readable in direct sunlight
- ✓ Can be operated when wearing work gloves (also with PCAP)
- ✓ Convenient operation using four freely assignable front buttons
- ✓ Screwless design for easy cleaning
- ✓ Weather-resistant, thanks to an IP66 housing and shatter-proof (IK08) and abrasion-proof front sides

Main features

- 10", 12.1", 15" displays and 12.1" widescreen display
- Resistive (AR), capacitive (PCAP) touch
- Intel® Atom™ x7-E3950 2.0 GHz processor
- Operating temperature: -30°C ... +60°C
- Wireless: WLAN, Bluetooth, WWAN, and GPS
- Wide-range power supply unit: 9 V DC ... 60 V DC

Software suite for charging park management

Intelligent control of charging parks

The EV Charging Suite software forms the interface between the driver, charging park, grid operator, and billing provider. It ensures the availability of the charging park, enables convenient management of charging points and guides the user intuitively using a touch interface.

Your advantages

- ✓ Intelligent load management ensures optimum distribution of the connected load and prevents overloads
- ✓ Easy startup, configuration, and monitoring via web interface
- ✓ Future-proof and scalable, thanks to the easy addition and management of charging points
- ✓ Reliable logging of all charging procedures for real-time visualization and precise billing via OCPP

Main features

- Supports OCPP 1.5 SOAP
- Minimum system requirements:
 - 64 GB hard disk space
 - 4 GB RAM
 - Intel® Atom™ Quad-Core CPU (1.91 GHz)
 - 8" touch panel with 800 x 480 pixels
 - 2 Ethernet RJ45 ports
 - 1 USB 2.0 port
 - Windows 10 IoT Enterprise 64-bit

|  Web code: #2234 |  | | |  | |

Programmable DC charging controller

The solution for modern fast charging stations

EV Charge Control Professional is the controller solution for modern fast charging stations. It supports both fast DC charging and conventional AC charging, and at the same time takes care of all control and communication tasks, including visualization on the operator panel.

Push-in Technology[®]
Designed by PHOENIX CONTACT

Your advantages

- ✓ Two independent charging points (AC and DC) with just a single controller
- ✓ Flexible use, thanks to free choice of programming in accordance with IEC 61131
- ✓ Little programming work, thanks to pre-assembled function blocks for vehicle communication in accordance with DIN SPEC 70121
- ✓ Easy system integration, thanks to comprehensive interfaces
- ✓ Convenient remote access via integrated mobile network modem

Main features

- DC charging in accordance with DIN SPEC 70121
- AC charging in accordance with IEC 61851-1
- Can be programmed with PC Worx
- Communication interfaces: Ethernet, 3G mobile, RS-232, RS-485, CAN bus
- PT1000 temperature input
- 16 digital inputs and 16 digital outputs

|  Web code: #2235 |  |  |
|--|---|---|
| Description | Programmable DC charging controller | Program and configuration memory with license for function blocks |
| Type | EV-PLCC-AC1-DC1 | SD-FLASH-2GB-EV-EMOB |
| Order No. | 1624130 | 1624092 |

CCS type 2 DC charging cables for high power charging

Fast charging in Europe with up to 500 kW

Using the new, cooled DC charging cables with High Power Charging Technology (HPC), you can achieve charging power of up to 500 kW. This lets you charge the battery for a range of 100 km in just three to five minutes. Thanks to the optional panel feed-through, installation on the charging station is fast and reliable.

High Power Charging Technology[®]
Designed by PHOENIX CONTACT

Your advantages

- ✓ Fast charging in just a few minutes, thanks to extremely high charging power
- ✓ Efficient cooling enables a low cable diameter
- ✓ Safe, thanks to continuous temperature and leak monitoring
- ✓ Maintenance-friendly, thanks to a replaceable mating face and open cooling system with environmentally friendly cooling medium
- ✓ Compatible with the established Combined Charging System (CCS)

Main features

- Rated voltage: 1,000 V DC
- Cable length: 5 m (additional lengths on request)
- Conforms to VDE-AR-E 2623-5-3 and IEC TS 62196-3-1
- Degree of protection: IP54 (when plugged in)
- Temperature and leakage sensors
- CAN bus interface and status output
- Cooling medium: water-glycol mixture

|  Web code: #2230 |  |  |  |  |  |  |

Second generation GB/T DC charging cables

Fast charging in China with up to 250 kW

The new generation of DC charging cables designed to the GB/T standard supports charging power of up to 250 kW, making the charging process for electric vehicles even faster. In accordance with the latest GB/T standard, the vehicle connector can also be locked in its bracket to protect it from vandalism.

Your advantages

- ✓ Fast charging of electric vehicles, thanks to high charging power
- ✓ Protection against vandalism, thanks to interlock in the bracket
- ✓ Safe, thanks to temperature measurement directly at the power contacts
- ✓ Reliable weather protection, thanks to IP54 degree of protection
- ✓ Individual branding, thanks to the use of your own logo

Main features

- Rated voltage: 1,000 V DC
- Cable length: 5 ... 10 m
- Conforms to GB/T 20234.3-2015
- CE-compliant in accordance with IEC 62196-3
- CQC seal (China Quality Certification)
- IP54 degree of protection (with protective cap)
- Silver-plated surface of the power and signal contacts
- Low insertion and withdrawal forces

|  Web code: #2231 |  |  |  |  |

Type 1 AC charging cables with PSE certificate

AC charging in Japan with up to 7.5 kW

Our type 1 AC charging cables with open cable end are now available with PSE certification, which is the conventional safety standard for electrical installations in Japan. As a result, you can now successfully sell your AC charging stations and wall boxes on the Japanese market.

Your advantages

- ✓ Successful sales of your charging solutions on the Japanese market
- ✓ Secured to prevent accidental disconnection, thanks to a U-lock
- ✓ Convenient handling, thanks to ergonomic design
- ✓ Longitudinal water tightness prevents water ingress along the cable
- ✓ Individual branding, thanks to the use of your own logo

Main features

- AC vehicle connector with open cable end
- Rated voltage: 250 V AC
- Rated current: 30 A, 1-phase
- Cable length: 5 m (additional lengths on request)
- Conforms to SAE J1772, IEC 62196-2, PSE
- Silver-plated surface of the power and signal contacts
- Low insertion and withdrawal forces

Protective cover for type 2 AC socket outlets

Quick installation of reliable protection

We offer special protective covers in order to reliably protect the AC socket outlets in your charging stations and wall boxes from weather influences. Thanks to its front-side screw connection, the new, self-locking protective cover for type 2 socket outlets is even easier to install.

Your advantages

- ✓ Reliable protection of your socket outlet from weather and vandalism
- ✓ Extremely easy assembly, thanks to a front-side screw connection
- ✓ Reduced assembly work, thanks to the pre-injected seal
- ✓ No separate panel mounting frame required
- ✓ Individual branding, thanks to the use of your own logo

Main features

- Conforms to IEC 62196-2
- Degree of protection: IP54
- Self-closing
- Dimensions (W x H x D): 93.7 mm x 85 mm x 32.5 mm
- Bore dimensions: 60 mm x 60 mm
- The screws are not included in the scope of delivery
